Thread: [Are the servers lagging?](#)

Dr. Einyel - March 6, 2019, 10:59 pm

I have like 30 min trying to start a thread ?

I can't preview the post, this message shows up

Is it only me?

I'll try in a couple of hours ?

Human - March 6, 2019, 11:00 pm

Yea, Ive been having some problems too. Im sure theyll be fixed soon.

Bluffer - March 6, 2019, 11:08 pm

Omni where you at? Plz fix HF.

Apparently there's a major 0 Day with Chrome and they are urging everybody to update their browsers. I just tried to post a thread and got 503'd.

I'll try in a couple of hours ?I'm having issues on my end too. But for me, for some reason my home wifi was returning a 403 forbidden error. Now I just double checked it and I got the same error page you got. As soon as I refreshed it i got the 403 error again. Idk what's going on but the only way I can browse HF is on my phone while it's not connected to wifi, and even then the pages are taking forever to load. :/

Sorry didn't mean to imply that this downtime/slow loading on HF is related to the 0 day. Just that the major bug in Chrome requiring an emergency update is a good topic of discussion for HF.

Trappy - *March 7, 2019, 12:45 am*

I put a VPN on for a European nation and now I'm accessing fine.
