Thread: [Leveling up Steam account with Bitcoin?](#)

Int Ptr - March 8, 2019, 12:04 pm

So I have a fuck ton of BTC that I don't give a shit about and I want to level up my Steam account. I'd like ideas for ways to do that that doesn't involve exchanging.

Thanks.

Well, to be honest, I'm looking for a more "automated" solution where I can deposit BTC or something somewhere and be sent them cards. I know in general that automated solutions exist but I don't know much about them or which ones accept BTC.

Key vendor bot accepts BTC for CSGO,TF2 keys and from CSGO,TF2 keys you can use bots that trade them for steam trading card sets based on my knowledge.
