iPhone 5c should work fine as long as you have iOS 10 or higher installed :)

You'll have access not long after purchase, I check orders multiple times a day.

Unfortunately at the moment I can only accept BTC, ETH and LTC.

You might be able to find someone on the currency exchange section here that can help you out, otherwise I would recommend localbitcoins for p2p exchanges.

Definitely worth the investment for all your fake live snap needs.

Announcement - iOS only

Signing certificates for 200 devices have been renewed.

If your app is closing immediately when opening, you will have to re-install the application.

To find your download link, I have written a quick experimental tool here:

<https://ota.snxp.app/search.php>

(Use through Safari on your iOS device!)

It's experimental but should find all the devices that are affected, if not, send me a message with your username and UDID and I'll get it manually.

In other news

I am extending the discount by a few more days, get the app while it's cheap!

Huge vouch for @PornFlakes, his app works flawlessly!

Im Cold - April 14, 2019, 11:37 pm

Very interested in testing this out once i buy.

Used to use Casper and a few other tweaks but haven't come across anything this trustworthy.

Have been making thousands on my missed Kik over the years let's see how this rolls

I purchased. Now how will I set this up? And will I be able to switch from one android to another android?

Say my shitty android to my better android?

I noticed this thread and was directly enthusiastic about it, I purchased the product and received an e-mail with further instructions a few minutes later.

The application is plug and play kind of, with this I mean very easy to install and to use.
I had a few questions regarding the application and @PornFlakes took time to answer them all, must say that the user is very friendly.
Directly after I bought another slot and until now I'm very satisfied. IMHO it's a steal of a deal, if you know what to do the money is easily made back within the day and even tripled.

You can see the video in the main post. :)

There's not much to it, the product you buy is called a "slot", you can bind one snapchat username to a slot which you can then use with the app.

Uploading is as simple as opening then app, and selecting your file.

The app pushes your file into the camera view within Snapchat where you can edit it and upload it.

The compression snapchat uses is applied when you import the snap instead of on upload.
End result is the same, the app has 0 control over it.

My vouch for PornFlakes

I gotta say, this is an awesome fucking dude. I've never used BTC in my life before and he helped me figure out everything I needed to know to be able to purchase his tool. He spent a few hours teaching/helping me about it and skip to the next day it finally got figured out and I was able to pay him and receive the program. After downloading his app, it was a little confusing at first glance since i've never seen anything like it but within a few seconds I was already uploading a picture from my gallery onto my story and pictures to people I have on my snap and they were all sent live without any troubles at all. The app works flawlessly and i'm happy to finally get back into ewhoring on snapchat. PornFlakes always responded to me within the minute, always answered my questions the best he could, and had patience like i've never seen before. Out of all the sellers selling modified snapchats I would highly suggest this one.

Not sure if I ever left a vouch, but I've been a member of Snxp App for a loooooong time now, and it is still working just as good today as it did on day one. I've only had to redownload due to patches a few times and in those few times the updates were pushed extremely quickly. I've never had the app fail to perform as needed and if it did I know I could be in contact with someone able to help within minutes on their discord.

This type of management and uptime is unlike anything else I've purchased on HF before, always

going to get a vouch from me.

Seems unlikely that you were banned just because of this, I don't know how to code but I think this app doesn't use any code to manipulate how Snapchat works or I'm sure you'd see a lot more bans as their DRM is quite invasive and I'm sure it doesn't bypass it as CokePokes is the only one to know how to do that. Are you jailbroken by any chance? I know they detect jailbroken phones now too.

I think I may have just been really unfortunate with my timing, my phone isn't jailbroken and I haven't been scamming but its most likely due to reports from competitors? It's been discussed multiple times both in this thread, the old thread, and on discord that Apple doesn't give people the option to replace UDIDs.

The form is also pretty explicit in explaining that only on iOS a UDID is required.

You're not wrong though, you do have to purchase a new slot to authenticate a second UDID.

It says from camera like every other app, and not camera roll

All apps that are sold say this.

You can send fake live snaps exactly like the Snapchat app.

darkair - May 1, 2020, 9:03 am

i'm guessing you mean that it doesn't say anything, cause if sent fom camera it wouldn't say "sent from camera" it will be blank :) and btw is it an external app for android, is there any chance that my snapchat account can get banned?

There's a difference between uploading stories and sending snaps, stories will say from camera like all other apps.

If you send a snap it shows nothing exactly like the Snapchat app.

Snxp is not seen as a third party app and will not be a reason for bans.

Added all pending friend requests, did you manage to get in touch? ?

xxtentation76 - May 3, 2020, 3:01 am

Interested for the app can we talk in discord ?

Hugh Hefner - May 3, 2020, 3:46 am

Is this another one that just says 'Camera'?

(May 1, 2020 09:03 AM)darkair Wrote: [\[CITE\]](#) i'm guessing you mean that it doesn't say anything, cause if sent from camera it wouldn't say "sent from camera" it will be blank :) and btw is it an external app for android, is there any chance that my snapchat account can get banned?

how like other apps? i know one app that you can put videos and photos on stories like that they were live and nothing appear up. i can share that with you maybe you can do it for this app too because look more real right? or i'm wrong?

Sure add me on discord or send me a PM, I think the only trick is to use 10.50.0 Snapchat version on Android though.

im thinking its not since he hasnt posted since september. My app stopped working today as well so
i guess its an end of an era.

existentialhack - November 16, 2020, 2:54 am

Mine stopped working a few days ago. :(

Are you still around or does anyone know of anyone else providing snxp or an alternative that works?

Yes if you find one please let me know. Or if he becomes active again. This app was the shit.

SIM-3218151 - November 23, 2020, 12:47 am

Will this work for snap alone, or other apps that ask for live camera feed?

Brenda_d24 - December 1, 2020, 10:20 am

My app stopped working today. Has anyone found an alternative equivalent to this app?

4UsPD1rAw0Yr - December 23, 2020, 5:53 pm

Damn my app just stopped working today out of nowhere, hopefully there's a fix soon

nulled.to444 - January 7, 2021, 6:49 am

do not buy that !!!!!!! There are public ways to do the same without spending money there is an app on github for ios that does the same and is FREE !!!!

Camarade - January 7, 2021, 6:56 am

I bought another app and I just saw that you have the same one as it, why?
