Does the Suite include the update system? So once the Suite is out of beta I won't have to download another installer to update to another beta or release.

EagleEye - March 12, 2019, 8:35 am

Sure, the suite is already receiving updates over our update system, you won't have to reinstall it.

You just need to send me a PM or, like you, create a message here in the thread. I sent you information to access the license system over pm, hope you like it ?

This one is the most advance licensing system here in the marketplace so far.

Hopefully this will be your next successful project.

I know I'm gravedigging, but I really feel like this product needs more attention. This seems like it would be a great license system to use.
