Thread: [XMR Protocol Upgrade \(silent miners\)](#)

narcicist - March 9, 2019, 12:49 pm

Pretty sure this isn't the right section, but I'm not sure in which section this specific problem would be more appropriate so here it goes.

So recently after the 1,788,000th block Monero suffered a protocol upgrade leaving the miner I had been recently using from NYAN-x-CAT useless and any other silent miners (except xmrigh $\geq$ 2.13.0, xmr-stak 2.9.0, SRBMiner $\geq$ 1.7.9, VulkanXMR apparently) I assume, is there any silent miners preferably free but if not hopefully cheap that weren't affected by this protocol upgrade?? Cuz this really fucked me up lol
