Thread: [Unlimited High Spec RDP Method - Limited - Start your own RDP shop](#)

D?ceived - March 10, 2019, 3:39 am

After a lot of thought I have finally decided to give up my method to generate high spec RDP's for free, no cracking or hacking. This method can be used to sell them, run software, crypto mine or whatever you see fit. The specs of the RDP's can be seen in my sales thread.

With this method you can generate 7-10 high spec RDP's in about 20 minutes work. This is not an e-book, I will personally teach you everything I know about the method.

No investment required, just a smart phone with 4g.

Price: 250\$

(I will accept any form of payment except paypal)

Sold: 0/3

Please note this method may be seen as greyhat depending on your moral views.

No vouch copies unfortunately, I want this method to stay as unsaturated as possible. What do you mean about sticky key?

And the proof is my sales thread where I already sell the rdp's I can generate

Site has already been shutdown.

They likely moved their servers but transactions are kept through the local merchants and customers in jabber.

Don't be Deceived , if he have methods like that, he could have sold 10 rdp's here for that price.

Everyone says their method isn't Sticky Keys, and without fail, every single goddamn time it turns out to be Sticky Keys. Plus, this is HF, so I'll believe it when I see it

You are right to be honest. There is some guy here few months ago or last year. Saying its not sticky keys but some other buyer told me it is, he even file a dispute about it.

Don't wana mention who to avoid drama. But yeah his thread is currently active now you can notice it..

Anyways I don't get these sellers sometimes..saying its not sticky keys yet it is just that they modified the code and tweaked it a little to consider their own private method.

You got any ideas why they do that? Like they know the consequences right? Yet still sells sticky keys and saying its not lol..
