**whit3** - March 11, 2019, 1:45 pm

[GET VERIFIED NOW](#)

I would like to present you our [SMS verification service](#). After the last incidents, it required me to [open the thread myself](#).

It works like all others, but faster, simpler and it's the cheapest.

Why should I choose it?

Because it is simple, fast and cheap.

How much does it cost?

You only pay if you receive an SMS verification code on the number that is assigned to you. The cost ranges between \$0.05 to \$1.00 USD, depending on the country and service you select.

What payment methods do you accept?

We currently accept Paypal, ETH, BTC, BCC, LTC and Credit Card (as a security precaution we use third parties as [selly.gg](#), [coinbase](#)).

How do I know it's for me?

If you're all about keeping your information private and secure when you're creating a new web account on the Internet, you could benefit from this service.

What countries do you currently have phone numbers for?

We try to always have Russia, Kazakhstan, Ukraine, Romania, Argentina, Brazil, Great Britain, Israel, Indonesia, Kenya, Kyrgyzstan, China (Virtual), Latvia, Lithuania, Macau, Netherlands, New Zealand, Paraguay, Poland, USA, Philippines, Finland, France, Estonia and more numbers in stock. However, it's all based on demand and availability. Our easy to use Dashboard will let you know if a particular number or service is out of stock.

Note: If the country or servion listed above is not placed on the website. You can contact me and we can add it or do manual verification.

When can I get started?

Immediately! You can [sign up for a free](#) account and get started instantly. Our system is fully automated and you can start verifying your accounts immediately after signing up and funding your account. (Minimum \$2.00 USD)

What services can I use with getsms.me?

There are many services throughout the web you can use the combination with getsms.me. Just to name a few - Google, Facebook, Uber, Lyft, Telegram, Amazon.com, Microsoft Live, WhatsApp, and Dropbox and many many more!

If you can't find what you are looking for just let us know!

Does my location matter?

No. You can use getsms.me from anywhere you have an internet access. It's fast, accessible, and easy to use.

Are the numbers mine to keep?

No. The phone numbers are temporary and disposable. They are deleted from our system once it's been used.

Can I buy in bulk?

Yes! Send us an email: [help@getsms.me](mailto:help@getsms.me) or contact us via Live Chat Box.

Can I verify more than one site/service with one number?

No. Each number that is given to you will only work for the particular service that you select it for. If you use it for another service, you will not obtain the SMS Authorization Code.

Why isn't your system receiving the SMS?

If you are on an IP address that has been blacklisted by web services, even if you request for the SMS, sometimes they won't send it. Google especially is notorious for this. Be aware of this if you are using a VPN that is sharing the IP with other users. That IP might have been blacklisted hence your inability to request an SMS. Make sure you use quality VPNs! I can assure you that our numbers are premium real sim card numbers.

What if the number isn't getting the SMS?

It's possible that number is bad! Sometimes a bad one gets through our fingers. No problem because you only get charged if you get an SMS Verification to the number. If you input the phone number given to you, and no text arrives, just try it a couple more times. When the time expires and no text arrives, our system automatically blacklists the number so it's no longer used in our system. When you request another number, it will give you a new number to receive.

You can go through the link and find everything you need. Don't forget to send your feedbacks :)

I received my credits as a vouch. Thank you.

I had time to test service, work like a charm. And the good thing is it is really very cheap compared to other similar services. Recommended

**Raymond "Red" Reddington** - March 13, 2019, 4:42 pm

Got vouch copy from the OP and used it.

It is fast, reliable and he adds service or country if needed (in my case added some Russian numbers).

Great service, thanks!

**flavoral** - March 15, 2019, 1:47 am

Layout & UI:

Homepage of the website looks clean.

There's multiple points packages with discounts/bonus for bigger orders which is nice.

Smooth login process, no delays.

Dashboard looks clean and well organized.

Service:

The website clearly shows you the countries available along with the how many numbers on stock.

The best thing that I love about this is the fact that it lists you the platforms that you use this service for along with the best numbers for those platforms.

Also, I really dig the idea of depending on the platform and country of the desired phone number, it will cost a different amount of points.

A nice thing about this is the fact that Your credits will not be affected until the phone number you were given receives the SMS.

I used 2 numbers for Yandex verification and got the msgs within seconds.

You can use vouch copy contract template in the thread, also you can verify any website if it is not listed in our site with section "all others".

But as you can imagine it is more expensive than other services.

Actually our sales strategy is simple. We offer cheap service for general purposes, but in countries like the United States or the United Kingdom preparing and serving numbers for such use with anonymity is not easy as others. So, their prices are a little more expensive but in general, our prices are better than fair.

Sorry for the inconvenience, if you need further assistance I will be right here.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,  
Stanley
