Thread: [Loki Botnet Help](#)

teditm - March 12, 2019, 2:54 am

Hi mates!

Is there anyone able to help me?

Namely, I installed the botnet loki, I logged in to the panel, I built *.apk I tried to install it on my phone and I do not see it in the botnet. Google protect did not throw it because I see that the application is still working.

Regards!

Can build FUD installable .apk for you, Help port-forward the incoming connections. and also fully setup a working stub.

Lmk if interested.

Completion \$500 usd. (guaranteed zombies/slaves)

\$250 installment 1 of 2.

Beginning // After work is Completed. Ty

Loki is out of date. Free botnets don't work.

This is a four years old thread. I doubt you will get anything from this.
