I didn't check how much I'm getting each match cause it's different every time. But u would at least level up 5-10 levels in few hours. If ur having it on LTMS

I'll start off by saying that OPs customer service is excellent. Whenever you have questions, he's

quick to respond. He really wants to make sure that the bot is working and that you are happy with it. The instructions are laid out perfectly, but if you need any assistance he'll be there to help.

As for the bot.. It works as advertised. You deploy in random locations, which is a plus. Because what I see alot is several people dropping at the end of the bus route. There will be several people just standing there waiting to be picked off. At least with this bot dropping you in random spots, you can get dropped in the circle, on top of a tree and make it to top 10, even in squads.

You can enable anti afk so your character moves around a bit, it can toss up emotes. Another great feature is closing out of the news or any other popups. I've used other auto clickers before that basically just start the match and go back to lobby. But if you earn something or if theres a news update, then the auto clicker just hangs, because its looking for the start/leave match button. With this, it closes the news update window and can get back to a new match.

Great job OP!!!

My honest review:

Ease of use:

10/10

Very easy to use you just log in, click the settings you want and have fortnite in the resolution with gamma at 0.50 with default settings. Hit start while you are in lobby and the mode selected and that's it. I leave it on for 10 hours while I'm in school.

Efficiency:

9/10

The bot will not get you banned at all or ever leave the game and mess up. It's created in a way to keep working and looks legit.

The only thing I would want is more movement but it's a minimalist tool. Made for just anti afk and no ban, smooth exp.

Service:

10/10

Anubis is a kind person, and the team is fantastic. The help and friendliness is just fantastic, great experience. No matter the question he answers or someone will. He replies soon as possible.

Overall

9.5/10

Cheap tool and secure so you should get it to level it up!

My review after a week of use.

Alright so overall the program is good and it works as intended that goes without saying it is a bot and not everything is perfect as i do run into the occasional problems of just random stuff that messes with functionality from random error messages that the bot doesnt click away or fortnite crashing for unusual reasons. Ig from long periods of run time 16+hours a day could cause some problems along that timeframe

Support- the support is great and will respond when he can (saying that as a note that he isnt always there but i can understand everyone has there own life to life other than being support 24hours a day it did take a day or so to get the program), the user is helpful and is willing to help through any problems that arises

Overall i give this a 9/10

Great seller, the FN Bot features all work and are most importantly stable! This is the best bot on the market by far, and definitely the only one working. Don't hesitate to buy anything from this amazing seller! He is quick to respond to any and all questions, the setup process and prerequisites are streamlined and they have a great video for anybody to get this setup.

This is the only bot I have found that gets really good xp/hour and is working with Season X and doesn't seem like there would be anyway for Epic to detect if you are botting vs regular input.

I will come back after using it to post some results of using the XP Bot, do not hesitate to buy this for a second!

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

looks interesting good luck with your sells :D

N604 - October 8, 2024, 7:41 am

hello, im interested.
please contact me

Edit:

I have purchased the assistant, which works pretty well! I haven't done too much tests yet as I don't have time but looks like ESP and Aimbot works nice! i haven't fine tuned the settings yet as suggested by the seller.

Important: the payment process and support from this guy was super. His availability is very high and very friendly!
I recommend!

somenormalguy - November 25, 2024, 5:32 am

Finally purchased and tested out. it's really great for an AI-based aim bot work smoothly all we need is a little tweak in mouse sensitivity. I was worried about getting banned but trust me this is 1000% safe.

thank you Anubis for helping with setup, btw is quite easy to setup too

Rin™ - December 13, 2024, 7:34 am

Please PM me so that we can talk about payment. I am interested in this.

guesstiduh - January 27, 2025, 3:15 am

how long does it take to complete the pass with this?

Missekat - February 13, 2025, 7:12 am

I highly recommend this guy and all his software. I have been using the Fortnite (this one) for some months now.

He have been really helpful and if everything goes wrong or is not working, he will be there really fast and help you out.

The only disadvantage is the tiers seperation, but even the lowest tier is working better than anything else on the market. I have also started using his AI for other games and they work just as good, if not better than this one! ;)
