Thread: [Is gore tolerated?](#)

Dr. Einyel - March 12, 2019, 8:36 am

Hi.

In some of my threads about venezuelan situation I would like to post some pictures about reallity but I'm not sure if it is allowed.

For example there is a video of a mother with her dead doughter in hands because there was no power at hospitals because of the blackouts...

Is that allowed here? That kind of videos??

or police shooting people during strikes or protests?

As long as you have warnings with a spoiler, should be fine

Idk, there's other websites for that. I personally wouldn't click it but if there's spoilers then I guess there's fair warning.

I guess it shouldn't be allowed to post something like that here. This is a tech forum, there are many other websites for that kind of content.

Don't post it here.

Thanks.
