Someone told me if you select the legend and then go unbox (You'll get most skins for it) Not sure tho

If you decide to remove the code on the command line after you receive the coins and skin, you will only lose the skin; you keep the coins.

I don't use the Flatline so I don't care for the skin. I just wanted the coins for the Apex Packs haha.

Thanks OP what a weird way to find such a thing haha

**Elitas** - March 13, 2019, 9:42 am

I don't play the game, nor do I have any idea what this even is but..

I really like how instead of asking people to PM you, you just shared it. People usually do the PM thing to farm rep, etc, so idk just found it oddly modest of you to share it without expecting anything in return, so gg for that.
