Yes, you saw correct. I'll develop a website for free.

I do not have that much experience with web dev, but I do have a bit of experience, that's why I'll do it for free?

I'll not make anything backend, and not too advanced when it comes to JS either since I'm really new to JS.

I know:

HTML

CSS

A small amount of Javascript

Shoot me a PM and let's talk! I'm doing this to build up my experience! :D
