unfortunatly i was very upsit after dealing with this guy ! , i give him this vouch after i bought things from him , but after 1 month of usage of this smtp he talking about , this is my real review !
first of all , my first sending of spamming email was after i purchase the product for 30 \$ and he advice me to get my scampage in domain so i send him more money and he also advice me to use premuim sendblaster for better resultes so i send me like 105 for sendblaster and 65 for smtp and domain then i put my vouch for him .
my first use of his smtp , i sent only 3000 email , none of them reach email inbox or even junk for aol and yahoo , and for hotmail he get into junk ! no matter how my letter is perfectly made .
then the domain keep fall down every 24 hours , i lost money for nothing !

I can confirm OP is using a 5\$ Host.

IP's are not warmed nor it hits inbox. I did get the service and I haven't used it since.

This whole setup can be made under 10 minutes by anyone, this won't inbox! (No matter what template)

I have been using OP servers for more than a month now and they get my jobs done. I have also purchased for few of my friends too that are not on this forum and they like it.

Personally for me, his servers are not shitty and I use sendblaster too (bought from him too). Infact his servers are the best smtp service I have used so far in this forum. Maybe you can take a look at your template or let him know the challenge u have.

Yes it gets 10/10 on mail-tester directly from the Sendblaster.. He set it up for me via teamviewer and I personally confirmed it. OP knows his stuff and I will recommend him anywhere, anytime, anyday..
