Thread: [Free Code to StringEncrypt - String & File Encryption for Programmers](#)

PELock - March 13, 2019, 6:25 pm

Free activation code to:

Code <https://www.stringencrypt.com/>

StringEncrypt page allows you to encrypt strings and files using randomly generated algorithm, generating a unique decryption code in the selected programming language. Simple & fast - try it yourself!

Supported languages:

C / C++

C# SHARP

VISUAL BASIC .NET (VB.NET)

DELPHI / PASCAL

JAVA

JAVASCRIPT

PYTHON

RUBY

AUTOIT

POWERSHELL

HASKELL

MASM

FASM

Code:

DCD7-C13F-7A2F-CF7E

? ? ?

hposix - July 7, 2019, 2:15 am

use the zerosum site free and opensource im edited zerosum0x0 source code and now supports 12 languages

stringencrypt is not free and very expensive for my budget DON'T BUY THIS SCAM

stringencrypt algorithm is very easy why pay for this shit

very bad compile time string encryption becouse using mt_rand and easy to decrypt its shit poly code

PELock - October 15, 2019, 7:57 am

You are out of your mind dude, it's our polymorphic code. Clearly spammer or idiot.

PELock - August 26, 2022, 4:02 am

VScode extension:

<https://marketplace.visualstudio.com/items?itemName=PELock.stringencrypt>

1895 installations for the extension itself, pretty nice. High five!

PELock - December 9, 2024, 8:45 am

Update

v1.7

Fixed connection problem to the licensing server

Software binaries and installers are no longer digitally signed, it doesn't provide any value to the software and has no other function than drain money out of my pocket year by year by the greedy code signing certification companies

Online interface

<https://www.stringencrypt.com/>

Desktop client

<https://www.stringencrypt.com/download/>

Visual Studio Code extension (3,652 installs already)
