Thread: [Real Hackers | Find bugs in Company websites | Paying 4 - 5 figures.](#)

The.Businessman - March 15, 2019, 12:24 am

Hey,

If you think you can use some tool and hack your way in, leave this thread immediately.

I'm looking for real and experienced bug bounty hunters who have sufficient expertise to hack company websites and report exploits like Remote Code Execution and XSS. I will pay you handsomely for this. If you think you can take this job, Private message me with a portfolio of your expertise.

I will show proof of funds and we can use a Middleman if preferred.

Thanks

TheBusinessMan

(Mar 15, 2019 12:35 AM)Previously Known As.... Wrote: [\[CITE\]](#) Why would anyone interested in bug bounties work with someone who has a clear posting history of running botnets? Seems like an excellent way to drag your name/reputation through the dirt for doing good work.

Not sure what you mean. I don't run a botnet.

zeepoval - March 15, 2019, 8:52 am

Just contact me.

I can do it professionally.

Thanks

What the fuck do you even mean lol. What's running a botnet have to do with this. Even if i do run a botnet, Why does that matter lol

Anyways, Thanks.

What the fuck are you even talking about? I never mentioned botnets? I'm a bug hunter and you are looking for real hackers... Now I just realised you don't even have brain cells.
