Thread: [Looking For Injection Client](#)

TOMANATOR99 - March 16, 2019, 11:05 am

Title says it all, looking for injection client that has rage features, doesn't have to have hypixel workarounds just normal server AC's. I already have Vape V3 and I'm just looking for something a bit different. Price not an issue.

Why not vape if you don't mind me asking?

I just need more blatant features that aren't made to specifically bypass hypixel.

I apologize for being rude but is the minecraft griefing section not dead yet?

Interesting... thought everyone here was a wizardhax fan still.

Section is dead.

Did anyone actually like wizard in that way? Sure, he used to give your client some traffic, but he strongly focused on his partner's clients and how much ad.fly revenue he could make.

I was joking about wizardhax, I remember this section back in the day when my friend was a member and I just used to observe him using it on HF and everyone seemed to hate wizardhax tbh lol
