Thread: [How many internet devices you got at home?](#)

Geass - March 17, 2019, 5:46 am

How many internet devices you got at home at same time? (phones, laptop/desktop, TV, tablets etc)

I get annoyed some times by my internet because sometimes there are at maximum 7-8 devices at same time open and the internet itself is bellow average because of the distance of the company facilities from my house.

What about you?

ririki - March 17, 2019, 5:48 am

Just computer and 2x server PC, iphone xs and samsung s10 however they are not plugged in the internet.

It is not plugged in, im not using it.
It's just waiting so I can ship it to DC.

My internet seems to be still the same speed unless I am on wifi.

sp??k? - March 17, 2019, 1:15 pm

Hmm 3x laptop 1x PC 1x TV 4x phone thats all

Ahmad - March 17, 2019, 1:32 pm

3x iphones 2x ipads 2x apple watches 3x MacBooks 1x pc(barely used) 2x TVs 1x apple tv

Not sure about the apple watches I doubt they really use any bandwidth. But everything else is connected and I rarely notice any speed issues

Slankey™ - March 17, 2019, 1:32 pm

iPad iPhone Xbox one google home and smart tv

Legends - March 17, 2019, 3:19 pm

I have 13 devices connected... never actually counted my amount till today. Gotta stop buying stuff

Yea... 2 PC, 1 nas, 1 switch, 1 ps4, 2 phones, 3 google home, 3 smart outlets

Pancake Boat - March 17, 2019, 3:44 pm

1 TV, 1XBOX, 4 Phones, 2 Laptops

SUI-3183372 - March 17, 2019, 3:51 pm

There are currently 19 devices connected to my network. This doesn't include 6 Raspberry Pis, game consoles, a few laptops, and a few tablets that are off right now.

Joel - March 17, 2019, 4:21 pm

2 PCs, 2 Laptops, 3 Phones & an Android Box.

Takehito Morokuzu - March 17, 2019, 4:55 pm

2 PCs, 3 smartphones, 3 smart plugs, 4 amazon alexas, 1 android tv box, one smart tv, one smart watch. That makes 15?

Android 17 - March 17, 2019, 4:57 pm

At night when everyone is home.... Roughly 7 phones, 2 laptops, 2 ps4's. Maybe more if extra people are here.

Geass - March 17, 2019, 5:22 pm

With technology rising I see a lot of people here have many internet devices.
Soon we will have a coffee machine with wifi ?

??????????Michael Kors - March 17, 2019, 5:24 pm

2 TV's, an Xbox, 2 laptops, 1 PC, 4 cellphones, 3 smartwatches and a Google Home.

Dope - March 17, 2019, 5:24 pm

Got two pc's and 3 phones.

Disease - March 17, 2019, 5:26 pm

Disregarding smart devices (smart plugs and switches, Philips Hue lights, etc.)- hardly ever less than ten. In the house is myself, my wife, and our young son. So at any given point, you're talking two phones, a number of desktops and laptops, tablets, printers, smart TVs (and Apple TVs), and game systems. That number surges when my son is jumping between his laptop, the Switch, his iPad, and the TV in general. And it's disregarding the various Raspberry Pi and Arduinos I have.

I also have a gigabit connection, so I don't think twice about any of it.

Mix - March 17, 2019, 5:48 pm

Like 15 different things that connecting to the internet

Apocryphon - March 17, 2019, 6:06 pm

Around 10, not all active 24/7 tho.
