Thread: [GAUDOX 1.1.0.1 LOADER \(Download & Execute\)](#)

IZIBANKS - March 17, 2019, 9:03 am

Hello everybody,

Can any body tell me please how to use the (Download & Execute) function in GAUDOX LOADER ...

i've tried to put the stub link and make a task and it shows that the task has failed ... and what should i put in the (Command Line:) field ?? ...

Thanks for your reply

Choose Down&Execute and put Direct download link in format ->

<http://Yourwebsite.com/yourbinfile.exe>

and that should Execute desired file on your bots

Just the filename with extension if no arguments are needed ... e.g.: your file is "anysh...t.exe", enter "anysh...t.exe" with no "" into the field.

I had same challenge... just use your direct like without http : //

i have an issue with Gaudox all my bot are coming with the ip [romanian ip] any fix for this?
