Is there any way to get into Uber or epic ?

Upgrade to R00t to have the same features and something more

But to answer your question, no

Hey,
Read more about upgrading here.

Ub3r has been discontinued and isn't available for upgrade, but you can get r00t instead.

Yeah the only option you have at the moment is R00t buddy it is worth it once you meet the requirements for it!

R00t is better than epic because it allows you to post in the Currency Exchange section imo.
