Mister Slyther - March 17, 2019, 5:37 pm

Took a UI Design I made for a client, decided to play with it and make it into 3D using Cinema4D

UI Design + 3D = So much Potential

vyactor - March 18, 2019, 6:35 pm

That looks super clean also its dope.

makmak - March 19, 2019, 12:12 am

Woah , long time i didnt watch an picture for a almost 5 minutes , it kinda drives me +1!

DataCrypt - March 23, 2019, 3:46 pm

I know this is a few days old, but I think it looks great

Felix002 - April 4, 2019, 3:37 am

I really like it, the only advice I give you is not to superimpose the figures in this case on the circle

SinisterSmile - April 5, 2019, 1:14 am

Very nice mate, keep up! It looks awesome!

Acus64 - April 11, 2019, 4:01 am

That looks hella dope man!

OutOnBailFreshOuttaJail - April 11, 2019, 8:47 pm

Yeah but for everything not VR it seems like too much. Anyways this is super dope!

dwalael - April 13, 2019, 3:26 am

Looks fantastic

Never thought about that before.

John Maus - April 14, 2019, 4:56 am

Very clean, nice job man.

R3d_Dragon - April 14, 2019, 6:57 am

nice design mate , keep it up

Pet_Wussy - April 14, 2019, 9:20 pm

Very nice my man.

Keep it up.

Mix - April 16, 2019, 9:51 am

I must say I thought this was made in photoshop but then read you made it with C4D and was like that explains the matts being so well shaded. Honestly its good but I think it could use some work around the edges the buttons and such are great but the background is a bit meh to me.

iNSaNa - *April 16, 2019, 12:06 pm*

Looks very sleek. I would just recommend working on some of the shadows and trying better to align them more. Other than that, looks good.
