We can do this in our package C

Just start a Contract, order the Hosting and Open a ticket to request and install SSL

Check our plans <https://hostlick.com/web>

Namecheap provides such hosting, SSL gets installed instantly with one click from Cpanel (they give you a free SSL)

<https://letsencrypt.org/>

Use this with pretty much any host for free SSL

Of course if you want higher security SSL certificates they will cost money. I like RapidSSL

they sslcetificate is 50\$ lol

i need shared hosting, ssl ccertificate, dedicated ip all for no more than 15\$

please help!

Clue - March 20, 2019, 8:46 am

pretty sure <http://infinityfree.net> do free ssl

and its free shared hosting as well with pretty good limits

aa123 - March 21, 2019, 9:52 am

thanks i dont mind paid services as long as budget is under 15\$ and gives ssl dedicated ip and shared hosting with instant set up no long wait!

come to my pm if u can offer this!

MUST ACCEPT BTC PAYMENTS!
