Thread: [EMV CHIP CreditCard](#)

TonyLuprano - March 19, 2019, 10:37 am

Hi HF,

So I'm doing a bit of research on the EMV chips that requires CHIP+PIN if u live in EU and CHIP+SIGNATURE for the US so my question is when you got a blank EMV chip card can u change the pin that's on the card and also put your own info on it I got most of the tools (Embosser - MSR - Omnikey3121)

?Apocalypse - March 19, 2019, 10:40 am

Not allowed in here.

Take a look at the [Help Docs](#) for any answer to your questions

@fuckevilangel

Man you guys really gotta find something better to do with your life.

Fuckin rippers ?

@fuckevilangel

Maybe you can contact me on Wickr: hiramblack, I could also need some further information,

thanks

yes you can but thats only if you have a dump without pin info and the ATM is a offline Atm meaning it dont verify with bank for pin but check with card and pin number you entered match if its offline and the pin matched what you put on the card then you can cashout

fuggin rippers ?
Eh, piss on it.

Yo OP.
You need a RFID reader/writer and the software to read and modify the data.

That's all I am willing to say.

Have a good day.
