Thread: [Best place to buy BTC with bank transfer?](#)

Godlypkz - March 19, 2019, 12:25 pm

I personally use bittylicious which has no limit; but I am enquiring about new customers (with verified documents).

I am looking for best place to buy BTC via bank transfer with no/low limitations.

Any ideas? I believe that bittylicious has a £300 cap for new customers but not too sure.

You consider an OTC broker? depends how large your purchase will be. I assume fairly substantial if you are looking for no limits

Maybe you can go thru with personal dealer, peer to peer, better same country as yours, because doing bank trf abroad need takes time to received.

Its not easy to find personal dealer (otherwise everyone would had), depending from the country you live in.

Coinbase if you're in the US, Bitstamp if you're in the EU
