The broker I use is named Closeoption. They have a bad reputation, but nearly every broker whether it be trading or gambling does.

I've never heard of anyone having any troubles with them. Most of my trading group at OTH uses them with no issues.

And the coolest thing is you can deposit and withdraw your funds to and from cryptocurrencies such as BTC, and Monero.

Upon registration you will have to verify yourself with ID, similar to what you'd do on any other broker.

You can trade with closeoption no matter what country you're from.

I'd totally appreciate it if you would sign up under my referral link.

In case you do, please feel free to contact me with a heads up, and if anyone has any questions regarding trading, please feel free to ask as well.

Yeah it is. But it's not with crypto however.

I won't do signals for the sole reason that I'd hate to be the reason someone loses money, which there of course is a chance of, even if it's a small one.

I'll answer some questions if you have some though.

I've heard about them. I've visited their site and I saw the package for the spider method and what not. Their testimonies did look fake so it raised a few red flags for me. Do you have telegram?
