Game - March 22, 2019, 7:28 am

Hi everyone!

I've obtained a collection of One Month Subscription - Xbox Game Pass codes and I'd like to sell them all for \$1 each or 100 bytes each.

Just donate 100 bytes and PM me or use the contracts system, whichever you'd prefer. You can also message to arrange a transaction.

Kind regards,
Krueger.

Fair enough.

I've just tested all of the codes that we have in stock again and they are all working perfectly, if you wish to purchase then just start a contract & fulfil your end of the deal once I've accepted it. Once payment is received, I will PM you your code.

Did you use the contract system when you did this?

RooshV - March 27, 2019, 3:34 am

I'm an idiot and I thought the website errors was his fault.

(Mar 27, 2019 03:34 AM)RooshV Wrote: [\[CITE\]](#) No I did not. He said he was going to send the code a few days ago after I send him the bytes and now the messages and my posts in this thread has disappeared. It would be pathetic if he scams for 1 dollar.

Yeah I think this loser is scamming me for a dollar. He's been online looking at my posts and deleting messages. I'm going to upgrade just so I can give him bad reputation.

Maybe something is going on with the website being down. My private messages with him are gone and I went into my "bytes" history and it says it's blank. I don't know how he can delete the messages between us if that's possible or the website is acting up. He is online but isn't responding to anything. I'm a noob and don't understand how all of this works but if he scammed me for 1\$ that is funny. I just bought crypto with coinbase so I can warn others about it in his reputation in 5 days once it goes through.

Hey, sorry the site was down and I wasn't aware it was live again.

I'm at work right now, I'll send the code when I get home in around 7 hours but you'll have to send 100 bytes again due to the downtime and database backup.

The downtime complicated a few deals for me and lost some contracts. Note; the Bytes donation was reversed due too Omni having to import an old backup of the website's database.

If anyone is looking to purchase, start a contract. I would never scam, especially for bytes or \$1!?

Just have patience please, it isn't my fault the website was offline.

That makes sense and I'm just an idiot. Send me a contract thing for 200 bytes and I will buy 2 of them when you get home and I'll give one to my brother so he can have gamepass as well.

I'll be sending the codes out tomorrow to those who have purchased. I had an issue with my PC today after a long day at work.

I appreciate your patience.

Start a contract to purchase. :)

Heads up to anyone. Deal with cation there is an open dispute over this topic. Op said he would send it hours ago after a dispute was open and still has not sent it even though he is online playing games. Just be wary

Hey, I'm having an issue with my laptop at the moment. I'm working on getting the codes to you, expect the codes within the next 30 minutes.

Edit: The codes have been sent to Digital Silencer.

So some of the codes were in use already. But to clarify the user is selling 1 month trails that you can only use on accounts that have never used game pass before. Probably should make that clear in the post.

Subscription and trail codes are different things

They work on accounts that have had the game pass before, but they do not stack a.k.a you can't put them onto an account that has an active game pass. This was stated throughout the thread.

Please send me the codes which were in use already & I'll see what I can do.

I do not have an account subscription. And I can not add any of them
