Hello do you know where I can buy btc for 10% fees or less with PayPal?

On crypto currency exchange forum fees are 15%

I use Coinbase, and I think they recently added support for PayPal (though Im unsure if this is only for cashing out)

Would be difficult to find - PayPal comes with a lot of risk, so you're paying for that risk with your fee

There's no website where you can buy BTC with PayPal for 10%, guaranteed.

You can find 5-8% on a good day here I think

Honestly, may get some negative feedback on this one but, idc.

I'd go with Cashapp, just gotta link your bank to your cashapp and buy BTC at 1:1 no fees.

100% you are correct, but cash app isn't for every country. But OP, be careful. If PayPal finds out you're exchanging BTC -> for PayPal. Your account will be permanently banned in a heart beat
