Anybody know any reputable sites to gamble on? Preferably where they accept crypto?

The biggest on most reputable site that i am aware of is Betcoin.

I briefly used it in the past.

Good luck on the tables OP

If you are gonna gamble crypto, I would try bustabit or bustadice.

Curious to why you even want to gamble it? Why not just hold on to it

don't bother gambling unless you learn to count cards first. And learn some strategies for stomping noobs. The best thing to do is look for strategies specifically for beating people who play like beginners.,

I'd stay away from gambling unless you're a professional
