Will like to test the email verifier... I'm interested

GTrails - March 27, 2019, 12:42 pm

(Mar 27, 2019 10:05 AM)n3t_d3m0n Wrote: [\[CITE\]](#) Will like to test the email verifier... I'm interested
I appreciate your interest buddy, I can tell you how the verification works, also see the video as it

briefly describes its mechanism. So here is the detailed description of it,

Verify Email List: So Verifying actually means validating that whether an email is Active* or Inactive* . An Active email is the one which is, in real time, being used by an active user. However an Inactive email may tell you that the email is associated with no* user.

Verify Email List: Methods explanation

1. **Verify:** When you hit verify, CyberBomber, would perform it's magic (certainly couldn't be disclosed) and will one by one, validate each and every email, that it has being provided in the email list. This may sound like very time consuming but it's really NOT. CyberBomber now has a Multi-Thread* System embedded which enables it's end users to save a lot of effective time validating emails. Currently, our thread limit is ^50, which could be modified on special requests ofc for free. At the end, after the email is checked for it's validity & all threads have completed their tasks, the list is split over to Verified(Active Emails)* and Non-Verified(Inactive Emails)*.

2. **Flush Inbox:** Flush Inbox is used to clear the data stream that was being set up by CyberBomber to your Server/Host(simply whose SMTP/IMAP/POP address you are using) and delete all the recent Emails that were present during email validation.

3. **Read Inbox Manually:** This method is used to manually view the log window for any errors that might or may occur during the validation process.

Is there any threads/services you can link me to for email list building? Maybe a way to do it with Facebook ads and landing pages

GTrails - March 27, 2019, 9:18 pm

(Mar 27, 2019 08:31 PM)indicud Wrote: [\[CITE\]](#) Is there any threads/services you can link me to for email list building? Maybe a way to do it with Facebook ads and landing pages

I appreciate your curiosity my friend, CyberBomber is capable of making it's own ComboLists! You can target a specific area or pin code or a company to get a list of the names of people and just put it in the Generate Tab's keywords section. Select all and hit generate. If 200k has to be your limit then set "upper limit" to 200k and you're done mate. You can target specific servers as your preference or ask me to add your customs which I would happily do. It's that simple my mate ?

carder30398 - March 27, 2019, 10:54 pm

can i send an email to person X as person Y (where person Y is not the real me)?
as in imposing someone else.

GTrails - March 28, 2019, 1:29 am

(Mar 27, 2019 10:54 PM)carder30398 Wrote: [\[CITE\]](#) can i send an email to person X as person Y (where person Y is not the real me)?

as in imposing someone else.

It depends, if the email address was ever registered in Mail server's database and wasn't deleted, the Mail would be delivered. In simple, The Email would not* be delivered only when the email address does not belong to any person/organization/etc or the server responds as email address not found.

Hope it clears off your doubt.

GTrails - March 29, 2019, 10:29 pm

Sales are up everyone! Get yourself a copy of CyberBomber now and get 10% OFF on all Crypto Payments!!!

Judge Dr3dd - March 29, 2019, 11:36 pm

Hello, you mean I can use this to send scam letters to the emails?

How many emails can I load at once?

And can I edit the name and email address of the sender...coz in your video, it's just showing the senders email. e.g PayPal <customer@...com>

And it goes for 14usd coz of the discount? Coz I noticed the original price is still 14.99usd

GTrails - April 4, 2019, 7:50 am

And it goes for 14usd coz of the discount? Coz I noticed the original price is still 14.99usd

I appreciate your interest buddy and here are the answers for your Qs:

1. Yes, CyberBomber provides feature of HTML Body so you can send letters or HTML Letters. Regarding the word Scam, kindly note not to use it for illegal purposes.

2. Currently I have tested CyberBomber for over 1 Mill Email ComboList and it works flawlessly, However you can Bomb even HIGHER if you have more number of threads selected.

3. The Name and the Address of the Email Account will automatically pop up while Bombing globally, regarding the video, that was a tutorial so do not worry about that. If your Email Account username is PayPal and email address is <customer@....com> then it will appear the same way when you send it. (No illegal purposes)

4. On the thread, the packages are already discounted, I update sales thread if changes in prices occur.

Hope your doubts are cleared, If still left, post it off buddy

Regards,

?

enigmahacker, Thank you for your purchase. ?

what is the guarantee on this? and is it to be used only on RDP? and the ones that you gave your vouch too, how come they havent written on the thread on how good it is....

GTrails - April 20, 2019, 1:34 am

(Apr 19, 2019 04:44 PM)bojicA Wrote: [\[CITE\]](#) what is the guarantee on this? and is it to be used only on RDP? and the ones that you gave your vouch too, how come they havent written on the thread on how good it is....

I appreciate your curiosity my friend, here are answers to your Qs,

1. From guarantee I hope you mean guarantee on this "to work" and that's a fair Q. This is the reason Video tutorials are made to demonstrate the working of the Software. And CyberBomber too has 1 for itself, which you can find at the beginning of the thread. Also we assure you 100% Inbox which is, tbh, not very common in mass mailers. CyberBomber has being tested over email lists counting upto 1 Mill and as per the price, it is worth a shot.
2. No, it is not necessary to use RDP.
3. This thread was never supposed to give out Vouch Copies, if you see, vouches were available in the previous thread which was closed due to reasons written there. However, We release updates for CyberBomber every now and then to make it more easy-to-use and efficient. So far, all the

customers who have purchased CyberBomber are satisfied with their product. Also, if they like to get the tool a little more moderated as per their needs, their requests are most welcomed and after a quick review, if their needs are possible, I release them in the upcoming updates.

Regards,
GTrails

click111 - April 23, 2019, 12:31 am

I'm very much interested in this program,

my question is, Can I use a non-existing email as the sender email?

and also, if I use an existing email, let's say test@gmail.com for example, I hope the sending limits of test@gmail.com won't affect how much emails i will be able to send out using this program.

GTrails - April 24, 2019, 1:15 am

Appreciate your interest in CyberBomber, from bombing 1 Mill email list, we mean that CyberBomber currently can handle bombing upto 1 Mill email lists smoothly. If your smtp server lets you send that many emails as per your plan, you're good to go. To get detailed description of how CyberBomber's verifier works, kindly look at my post here ([Verify Email List: Method Explanation](#)). Also we gaurantee 100% Inbox, For any instance if you fail to land in inbox, support over Team Viewer is given 24/7.

We do not have any lifetime package at the moment. The maximum you can chose is 6 Month Package (+1 Month Free!) for a price of just \$45.99. To make a purchase kindly create a contract.

Regards,

GTrails

1. Bomber can send x amount of email to same email id?
2. Regarding SMTP server. If I use gmail smtp server, is my gmail account in trouble?

Appreciate your interest,

1. Yes, you can send x number of emails to the same email ID. In CyberBomber, you can use the Spam Function to do this or Select the Unique Spam Function, which will make every copy of email, unique so that they don't stack over each other.

2. Your gmail account is totally safe, you can use it the way you want.

?

Op verifier works by sending text message, verified my mail and it it sent message to my inbox as test and it showed valid, nice.

chritech - May 17, 2019, 6:48 am

i think you need to work on the email verifier as i observe it verifies a none existing email.. I tried with hssslklkskdwoewoioino@gmail.com and it markes it as verified.you might want to take a look at it.otherwise, everythingi is fine

tj9t9 - May 17, 2019, 9:34 pm

Man, I just need to send out a few spoofed emails is that possible (of course you can charge me for them) do not need the entire software as of now

lmk

Uncertain verified list could come due to several factors, even if the settings are correct. Like it can be the issue if the latency over connection could be high or the server could not respond with the data in a specific amount of time. You can message me on Skype if the issue follows. Regards,

(May 16, 2019 02:11 PM)jacksparrow99 Wrote: [\[CITE\]](#) Op verifier works by sending text message, verified my mail and it it sent message to my inbox as test and it showed valid, nice.

ok

simmdia - June 15, 2019, 3:21 am

@ Gtrails.

Pm me. I want to purchase but need few questions answered.

- 1) With any smtp IP, email and password, Does your bomber still deliver INBOX 100% ?
- 2) What if it doesnt deliver inbox 100% ?
- 3) What of IPS blocked by spamhause ?
- 4) With gmail, yahoo and hotmail smtp IP , email and password, does it still deliver INBOX 100% ?

kindly let me have the answers and i will go ahead and make a purchase contract

Purchased CyberBomber a couple days ago, vouch for Gtrails, this mailer is AWESOME!!!! The tool works as said, user friendly, also multiple smtp is really great. OP also gave me support over anydesk. Great work mate, I am really happy with the inbox rates of Cyberbomber. 10/10

MnMs - July 15, 2019, 8:57 am

Inbuilt SMPT doesn't work. I am waiting 10 days for him to fix it. Also for some reason VirusTotal detected StupidCryptor and GenMalicious-BBY, Trojan that attempts to gain "root" access (administrator level access).

Virus Total links:

[VirusTotal](#)
[VirusTotal](#)

[VirusTotal](#)
[VirusTotal](#)

At least do some research before you say. Now read the following carefully,

Things you must know before you make your claims,

The Inbuilt is does refreshed every 3 days and even earlier few days, only the issue is the moment its done, most of the users abuse its daily sending limits and thus the status says the account is not allowed to send any more mails.

The detection you see on VirusTotal is only due to the fact that CB is obfuscated in multiple layers in which one of the layers is of ConfuserEX. The program is set to run as admin by default due to the fact that it has to create "settings.ini", "login.ini" and "logs.txt" during email bombing process. As well as during email verification process the tool creates "Mail/Inbox" directory to store its results and prevent data loss on app crashes and thus it clearly needs "Admin rights" to perform such tasks else an exception will be caught stating "Access denied".

Now these are some basic information you could yourself understand from reading your Notes but you had to do it your way so fine by me.

Also you were provided Video Tutorials as well demonstrating a quick tutorial on the tool + on new updates. Also I remember you are present in our discord server, where we continuously provide support to all the members who create tickets (as also announced in #announcements) channel). Support staff is always there to clear your doubts too.

I can help you further with your doubts/issues or you can keep it this way arguing with stuff you can understand on your own.

Hmnn, you have free inbuilt smtp and you want to send more, you will need private smtp to power you campaign, not only you use the inbuilt smtp as too many cyber bomber people abuse it too

much which makes it weak and not lasting but better a good private one and use than the inbuilt one.

About the virus total, how do you expect to send when your windows firewall and defender is on, bro even cc cleaner and other apps are still labeled on virus total as infected.

If you think there is backdoor, check task manager or use process hacker to see if it has, answer is no backdoor

I have use cyber 6 months lisenace and its working perfectly and good for me as i see my sent logs in the folder.

noupzy - July 15, 2019, 3:31 pm

hey bro i just opened a contract, please accept. i just hope this works as advertised.

MnMs - July 15, 2019, 3:59 pm

<https://gyazo.com/aa361b2919d1f0db3016a5937ccc3ddf>

Ok bro, but here is the deal, i dont work with gtrails or seen him personally, but i am a customer like you, but the reality is, if you buy hacked or cracked smtp from these spam shops, likely you will land spam box becuae most sellers do resale, also what i learnt is that you must check your ip on ip blacklist to detect if you are not blacklisted from these spam bots like spamhaus and rest, lot of them out there becos email filters the source ip of the letter either plain or html, the spf and dkrm of the smtp and it checks if the smtp is blacklisted or not, if you send html, it detects spam trigger words like money, account, credit card and a lot.

Mostly i use N-o-r-d vpn and it has dedicated ips never blacklisted to spam or hma vpn which will rotate ip.

every 1 minuite to help the letter land inbox.

So think about the inbuilt smtp in every customer cyber, kinda of too much abuse. Landing in spam entails a lot of things, at first i used php mailer and land spam but with clean smtp, you will land inbox, actually not the mailer itself but the smtp. You can send him your problems personally and is like most sellers respond to pm than writing on their sales thread here. Sharing idea and experiance bro and not under influence or favour from seller, i dont know him.

noupzy - July 19, 2019, 11:31 am

Control accepted buddy. :)

GTrails - July 27, 2019, 3:20 pm

New Update Released!

Following are the added updates

+ Row Shift and Random Shift added for Multiple SMTP

+ Terminate/Abort process button added to Processing Window

+ Save SMTP List added

Row Shift - After sending an Email from current SMTP, the control is shifted to the Next/Following SMTP. If the last SMTP is reached, the program will loop again from the beginning of the SMTP List.

Random Shift - After sending an Email from current SMTP, the control is Randomly shifted to any SMTP present in the SMTP List and the process will continue unless all the SMTPs reach their maximum limits.

Important* Every SMTP that is loaded is used to its maximum capacity. If any SMTP reaches its sending limits or catches an exception, it will be deleted from the SMTP list and the control will be permanently removed from that SMTP for the sake of maintaining a fresh SMTP list at all times during the bombing process. Also in this process your saved SMTP list will not be tampered.

Note* For every Email Address to which Mail is sent, a different SMTP will be used, which will be chosen from the SMTP List provided by you and where the shift from one SMTP to other will be

according to the algorithm(Row/Random) you may chose.

Screenshots in Sales Thread have being updated as well.

Anonz8 - July 27, 2019, 10:49 pm

How clean is the built-in SMTP, can i send, 20 millions emails in a week to Gmail inbox, for example?

My goal is 20 million emails to Yahoo, Gmail inbox, to active corporate emails.
ideas?

(Aug 3, 2019 03:13 AM)GTrails Wrote: [\[CITE\]](#) Yes you can mate. We refresh our inbuilt SMTP every 3 days for the best inbox delivery.)

Delivered bud. :)

Beautiful, will be buying soon.

Anonz8 - August 7, 2019, 4:34 pm

I am interested in the built-in SMTP server.

What are the hourly, daily sending limits with it?

I'm thinking of doin 100 emails at a time, into Gmail addresses.

Which email host/domain should I use, if I am also using the built in SMTP?

ty!

AnonFawkes - August 14, 2019, 6:58 pm

Bumping to come back later, OP, do you have a good source of Inbox SMTPs we can use? the dragon guy I think is a shill.

Mr lavalllee - August 20, 2019, 10:57 pm

WORST SUPPORT EVER THEY WILL NEVER HELP YOU AND NOTHING WORKING BE
AWARE , IF THEY SAY THAT IM LYING I CAN POST ALL THE LOGS. ANYWAYS BE AWARE.

YOU CAN EVEN GO TO THEIR DISCORD NO ONE IS GETTING SUPPORT

Big G - August 21, 2019, 4:03 pm

Please check your inbox, I've bought 1 month licence.

csrx - August 21, 2019, 5:14 pm

im interested in buy this, but i have some questions...

Need Gmail accounts to bomb others?

Can reach inbox in hotmail?

GTrails - August 28, 2019, 12:19 pm

If you wish to use Gmail smtp then their daily sending limit is 500. However it is recommended to use custom SMTPs to get higher sending limits.

It is true that I wasn't active online since the past few days but you were provided the basic guidance of the tool through video tutorials and it's not even Support Team's fault for not helping you for so basic queries.

But anyways the project is back up again and all the Support staff has being instructed to attend to any queries that you might face, all you now have to do is PM back to me or Support on discord.

(Aug 21, 2019 04:03 PM)Big G Wrote: [\[CITE\]](#) Please check your inbox, I've bought 1 month licence. PMd you back mate ?

Sure you can use Gmail SMTP to send out your Emails mate (a SMTP of your choice can be used as well). Also Inbox is 100% guaranteed, including Hotmail. ?

msutton - August 28, 2019, 1:25 pm

Hey menaxe, just to let you know the inbuilt SMTP renews every 3-4 says, it's automated, so you'll have to wait for a day if its daily limit is exhausted bud.

menaxe - September 17, 2019, 1:35 pm

THE STUFF VE not delivered one single mail, talk more of using up daily limit.

DrSpy - September 17, 2019, 7:18 pm

Thread title says scraper. But i do not see any scraping option in the software there is only Sender, Generator, Email Verification. Where is the SCRAPER?

jacksparrow99 - September 18, 2019, 12:11 am

Yoo bro gt rails is not bad as you think, people are facing smtp problems but that is not gt fault, as you will need smtp to make it send, why are people still confused of smtp and mailer. Gt makes inbuilt mailer, so you can feel or see how the cyber works.

(Sep 19, 2019 10:23 AM)olujacobsolu0 Wrote: [\[CITE\]](#) Thanks for telling me this !!.. lots of swindlers in HF

Lol swiinger , naaa he is not. I am a customer too and vouch his product

rogerand19 - September 20, 2019, 5:58 pm

how does the email generator work? does it scrape valid emails?

E-land Factory - October 28, 2019, 5:59 am

Highly recommend! Really amazing software. everything is working and loads of options, Good price Also.

morrgan - October 29, 2019, 1:14 am

GTrails is a SCAMMER.

He is now selling a fake doc/xls/pdf exploit on his discord group. DO NOT FALL FOR IT.

He just scammed me 100\$ and quickly removed me from the group so i don't expose him.

No one should fall for that

He is selling 100\$ monthly, i had to trust him cos he sells mailer here to members here and on his discord, which still doesn't work as advertised.

He has now resorted to scamming members with fake exploit offer on his discord.

When u pay he delivers and non-working fake exploit tool to u and then remove u from his discord server.

Y'all should be careful not to fall into his trap. I'm a victim

Well I see why you have a negative rep now. First thing I've never made any announcement of selling ANY tool other than CyberBomber. I do not deal with anyone without a contract so if you've being scammed by someone who claims to be me its not my fault. I've told a dozen times to create a contract before purchasing CyberBomber and make sure that the profile ID is mine and not of someone pretending to be Gtrails.

Dude YOU ARE A SCAMMER!

You scammed me on your official Discord channel/group, not here on HF.... It was you and no impersonation! I'm not a kid okay.

You advertised new product (Fake doc exploit) there in your Discord channel (Can an ordinary member advertise a product in discord #NEWS #INFORMATION or #RULES section? Only the ADMIN has access to those areas.

After i paid through the link you posted in the #NEWS, download link of the fake exploit was sent to my email, after i realized it's fake and doesn't work, i complained to you privately on your discord, you said server has been down,

i waited 2 days yet nothing, you kept telling me same shiit, when i discovered you are a sick ass retarded scammer was when you were busy chatting privately with others that picked interest in the fake tool, trying to convince them to purchase a non-functional crap.

I knew this cos 2 of the guys knew i had already purchased and asked me via PM if it works, i told them to save their money. Next thing you blocked me so i don't expose you publicly in your Discord General chat.

I had to report the sales link and it was taken down.

I hope you are still eating the money since then? It hasn't finished right?

(Nov 23, 2019 04:41 AM)msutton Wrote: [\[CITE\]](#) lol,his thread and shop says cyber bomber and not exploit, if you bought exploit else, don't sales thrash him here.

(Nov 26, 2019 12:20 PM)morrigan Wrote: [\[CITE\]](#) ...

Despite all the good story you've made mate I see you contradict yourself lol. I don't even think I need to explain it to you. You say I used to sell some exploit but I don't find it anywhere.

You say no one can make an announcement in the #news, #announcement channels in the discord server except admin, well that true and so I ask where is it? Where are the announcements? Where did I ever officially said about some exploit being sold by me?

Even the images you show of the product delivery mail is from some account named Acrux. I haven't even used that word anywhere in my sales till date lol. Also anyone can put my id as support staff to impersonate me and that's why I say to use the contract system.

Also what you say about CyberBomber is your own issue. Well you're gonna face troubles when you jump right in the software without even properly watching the video and pdf tutorials you are offered.

Also sales you have made off hackforums stays there. What I can suggest is at least check the person who you are purchasing from. Use contracts as often as possible and don't trust people you don't know. If you think the purchase is risky then use payment methods like PayPal that have buyer protection which is also one of the methods you can use to buy CyberBomber.

CyberBomber project is closed for the moment. We are working on a better version of the tool which will soon be available publicly. More tools are on their way to keep all the customers happy and satisfied. Until then, see you soon, :D
