Hi Blatngu,

May I ask your opinion on some stuff about which botnet is best via XMPP?

Thanks.

Any temporary vouch copies?

Solid review in return.

(If not no worries mate)

Good luck with sales!

One a seller gives then revokes by some authentication method or some sh*t like that. It's better than just giving a copy away.

Blatngu® - April 7, 2019, 11:39 pm

No I'm not giving any vouch copy out, for review check the old thread. Link can be found at the first row of this thread.

the source of the botnets you offering are cracked or legit?

Lombarpine - June 5, 2019, 2:06 am

those are cracked atleast im 100%

Blatngu® - June 5, 2019, 9:34 am

I don't offer source code of the builder only the builder itself as an application, but if the panel isn't obfuscated you can see the web files source code.

Those of course are cracked as the price tells ?

Because I only do botnet setup, not rat ?

StickTalk - September 18, 2019, 12:21 pm

How stable are the bot sources? I noticed that they are web based.. are the reliable if say I reach a substantial amount of slaves?

They are stable enough as long you have a decent server for holding x slaves

Young Sosa - September 19, 2019, 7:25 am

the sources of the botnets you're offering to setup are cracked or licensed?

I'm pretty sure they are cracked lol.

Actually, some bot are not sill sold so you can have them only cracked. Others are open source / free botnets.

Botnets that I suggest and I've works but of course some features won't work flawlessly like some certain features, 100% working botnets are the paid one's.

Were you satisfied with the purchase or not?

BoysWhoCry - November 25, 2019, 3:08 pm

I bought from him a while back and after some research i found out the builder he gave me actually had a virus built into it. And it infected tons of files on my pc in attempts to spread itself. Would say deal with cation. I tried to reach out to him but no reply as of yet. Will keep posted
