We recommend you take the time to read the [HF Help Documents](#) section. The answer to your questions should be contained in there.

powerful and stable = not cheap.

It depends of your needs... Simple loader, stealer, miner, ddos, reverse proxy or some other stuff? And good quality mean price!

What are some good botnets these days those?

Betabot was the shit years back, I'm seeing a few names chuckled around, What's recommended?

I personally recomend ParasiteHTTP or for auto spread I'd use SMM (being fully nonbiased) although parasite is one of the only bots I've used "seriously" so to say, I've seen potential from these so I'll list them out for ya :)

These are in no order!

AzroUlt

SMM

Parasite

Smoke Loader

These are the main ones I've seen and used
