Hi Everyone,

Today, we are extremely excited to announce the launch of [Micerace.com](#), the world's first live online mice racing site, where you can have heaps of fun, while betting on your favourite mouse

Mice

We currently have 24 Mongolian Gerbils racing.

Races are between four mice at a time, which allows the mice enough time to eat, sleep and rest in between races, ensuring they have the chance of becoming the next Micerace champion.

The mice are extremely well looked after and are fed the best food and kept in new, clean cages.

Currencies

Currently only [btc] is supported.

The Track

The track is 1,5 meters long and has been custom built for [micerace.com](#).

Cameras

There are cameras in the starting gate of each lane that enables you to keep a watchful eye on your favourite mouse and its competitors.

The main race camera gives you a birds-eye view of the entire racetrack.

Our [leaderboard](#) allows you to view photo's, stats and other info on all the mice.

Distinguishing between the Mice

The mice are chipped with RFID chips by professional veterinarians.
By scanning the RFID chips, we are able to identify each individual mouse.
Before every race, the mice are scanned to ensure that the correct mice are placed in the correct lanes.

Tracking the Mice

There are IR sensors at the end of every lane. Once a mouse crosses the finish line the sensors are triggered, and the winner is determined.

Betting

We currently only offer Pool Betting, but we will soon be implementing fixed odds and combo betting.

Currently the minimum betting limit is 0.00150000 satoshi's (Roughly \$5) and the maximum betting limit is 0.00500000(Roughly 20\$).

Pool Betting

Every player bets on their preferred mouse and the bets go into a pool.

Once the 5% rake is removed the remaining pot is proportionally split between the players who predicted the winner.[/b]

Example

Player A and Player B each place 100 on Mouse 1. Player C places 100 on Mouse 2. Player D and Player E each place 100 on Mouse 3.

The pot is 500.

Mouse 1 wins.

Player A and Player B each get to keep their original 100 and they get to equally share the remainder of the pot minus the 5% rake.

Remainder of the pot is 300. After the rake(5%) is subtracted 285 is left.

Because Player A and Player B both bet 100 (equal amounts) the 285 is equally divided by 2.

Player A and Player B each make a profit of 142.50.

Operating Hours

To start off with we will be operating from 10:00 to 20:00 CET (GMT +1). We intend on scaling this to 24/7 within the next month.

I can't.. I'm done. This will be my new addiction.
I can't stop laughing..

#Skyline - March 28, 2019, 3:24 am

Now this is the most realest thing I've ever seen on HF.

Can we sponsor a mouse? I'd like my company logo on one.

Did you just buy this project, or why are you reposting the same thread?

Nevermind, the other thread is off in the ether.

Love your originality. Really nice idea bro.
Good luck with the project!

We are toying with the idea and will put out an announcement soon. :)

Best Regards!

Question, can you just watch the mice races or do you have to purchase to watch?

You can just watch them :)

Best regards.

We are upgrading the structure of the website in the next few weeks, so races will be offline in that time.

Hey guys, quick update!

We are now running a 24/7 stream, and we have added fixed odds!

Best regards!
