? Advice ?

If you want the best runtime result I recommend to use CypherIT with mLNK v2.0 it is the best combo!

I've added RenAndStimpy on skype and xmpp which was the contact details listed on the forum, i have no idea about discord. RenAndStimpy closed his pm so i can't message and since yesterday i initiated a contract it is still on "Awaiting Approval". I just dont know why you guys made it a little difficult to purchase this mLNK builder. Your pm response didn't help. How else can i purchase this?

Yes. Prices change... No idea what your other question means for mLNK...

mLNK works with ANY .exe, .vbs, .js, and .dll file.

So can I use this just as a dropper?

I'd prefer to have Startup enabled with my Crypter, so I'd ideally just use the LNK exploit to download my Crypted file.

I won't get in more details, as I am not like that and respect our mutual personal relationship of a long time.

I am disappointed and I think you underestimate your self's.

You're worth much more.

Don't forget! Money can get you as close as to the gates of heaven. (all meanings)
Just check the sending BTC address and you will understand your self's.

You lost a great friend & Business partner

Reason ? one big question mark... maybe its your age. you'll regret it if you get older and look back at this post.

Correct me if I am wrong , So there are 2 output options? Payload and Payload and Decoy?

If Yes :

-Which is the best option for FUD(with crypt)

-Payload output is what extension?

If No:

-How long will it stay FUD(with crypt)

mLNK converts ANY exe vbs js or dll file in to a .lnk (shortcut) which bypass's SS alert and WD cloud/mem scanner which NO crypter can do alone Outside of a zip you do not see the .lnk so you can have it as any extension you want!

Decoy is like a binder/downloader

FUD last months, we only have to refud once a month IF that!

Sure I sent you a PM of the video

Yes it is fud, you still need to crypt your file BEFORE you use mLNK.

Then your crypter only has to bypass the basic scan of WD (as mLNK will bypass the cloud/mem scan)

Runtime will all depend on your hosting and EXE, VBS, DLL , JS file.

You can contact via PM or HF convo for further assistance.

Also Dyncheck and those runtime scanners can easily be tricked with delays and msg box

We manul test our products against major Avs daily!

Fire_Star - April 19, 2020, 6:02 am

do we need a crypter to use with your product or u fud it regularly??

mon0s startx - April 19, 2020, 6:06 am

which private crypter do you recommend to use with this product?

martigo333 - April 21, 2020, 5:57 am

I don't recommend buying this tool. Trade on your own risk. their telegram handler is not a sincere human being. When you say something truthful they block you. I wasted money and I don't want you to waste your investments.

Ren And Stimpy - April 21, 2020, 7:13 am

Sorry Martigo, as you were having USER issues's and instead of listening to our team on how to fix

YOUR USER issue, you then harrassed and sales trashed.

Bye to your bull crap product. I don't need it anymore either. For your information I can never have a user problem with such a simple tool. What you're saying makes it sound more dumb. There's absolutely nothing enjoyable in your tool, its full of detection. My concern was about windows defender detection. You guys don't want to talk about detection on your telegram chat so you can rip more victims of your product.

Ren And Stimpy - April 22, 2020, 8:31 am

Yes it bypass Windows Defender with NO issues and ALWAYS has.

If you get GERMANW!PER detection that is from your url shortner and/or host

We are online amnd able to assist anyone just PM me or start a HF convo

mcdanialheid - April 22, 2020, 9:51 pm

Hi, i am interested in your product. it is true that changing exe to lnk chrome will not ask - "not commonly download" error?

please pm me your Telegram so we can talk further..

Thank you.

Thank you.

mLNK converts ANY exe vbs js or dll file in to a .lnk (shortcut) which bypass's SS alert and WD cloud/mem scanner which NO crypter can do alone

Inside the IMG or ISO exploit or if extracted from a ZIP you do not see the .lnk so you you can have it as any extension you want!

I am only support on HF!

But we have full team on Discord and Telegram and on Website, which I have sent you a PM

Stanley - April 29, 2020, 9:12 am

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small byte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
