Thread: [Amazon FBA Business Generating \\$5000+ in sales a month!](#)

Carbohydrates - March 28, 2019, 6:34 pm

Just hit over \$5000 in sales this month.

Around 20% profit as of right now, but has room to grow to up to 40-50% profit.

I've really got something going for me now. Thanks to MVMT and his help, I'm here now.

I couldn't have done this without his help, but now that I know what to do, I am expanding...

Things to do:

1. add variations to my first product (Soon) (if anyone has gone through the Amazon template and could help me with this that would be neat, it's a hassle and giving me errors all over the place)
2. Start a 2nd product
3. Become trademarked.

My sales have increased tremendously since I started on Christmas, I'm going to start looking for a new product in the same category and trademark my brand

I hope to turn this 1 product I have into multiple products under a brand. Hopefully by the end of this year I have 3+ products up on Amazon.

Excited for the future and just wanted to brag about this, because well, it's dope as fuck making money online.

Oh master teach me your ways!

But legit hmu im interested in getting started and would love some advice!
(Don't mind greasing your hand either)
