Thread: [IM5 Down?](#)

basshunterer - March 29, 2019, 1:08 pm

When I try to open Imminent Monitor, I get this message:

Imminent Monitor was unable to connect to the licensing server! Please check that your internet is connected.

If your internet is connected please check your firewall/anti-virus isn't blocking Imminent Monitors connection!

If everything seems fine from your end, our licensing server may be down! To report this please visit help.imminentmethods.net and submit a ticket!

Is it just for me or it's down for everyone?

int - March 29, 2019, 1:09 pm

site is still up

(edited so I am not advertising their autobuy)

I noticed that too. But is the tool itself working for you?

Okay, thank you. I hope someone else who is still using IM5 will reply.

*****Wolf***** - March 29, 2019, 1:33 pm

Yes me too , seems down the licensing server

Redwolf3221 - March 29, 2019, 1:34 pm

They will get Reboot in 1 day. or in just hours just wait

anyone can Recommend Crypter for IM5 ?

int - March 29, 2019, 2:47 pm

yeah looks like it is down, multiple people were asking about it.

down for me to ?

s??l?s? - March 29, 2019, 8:42 pm

Im5 has become silent and very suspicious in last some days,from the time owner is missing from hf.

Its not working for me too from today.

But i have a snapshot on vmware and i took snapshot when it was logged,so its working for me,when i am restoring to that point.

but yes after 10 minutes it says connection lost,i can work for 10 mints normally.

so either they are trying to block logins from some users or there is some suspicious activity.

GTrails - March 29, 2019, 10:52 pm

I logged in yesterday bud, still up for me

For me it's still down. ?

jademanworld - March 30, 2019, 4:16 am

Working for me too dude. Not sure whats wrong with yours

Were you logged in from yesterday, or you are able to login now?

Selfpwned - March 30, 2019, 4:57 am

For me it is not working, too.

Some days ? i'd say months. It might go down really soon.

BlackDee - March 30, 2019, 5:29 am

Down me for me too. It should be down for everyone?

Selfpwned - March 30, 2019, 9:26 am

RIP best RAT.... hope there is coming some good rat very soon.

magichack3r - March 30, 2019, 9:29 am

I heard that the rat died. So look for new alternatives.

Where did you hear that?

BlackDee - March 30, 2019, 10:45 am

The owner should warn with a message or something that rat is going to die. This is not serious.

SUI-3183372 - March 30, 2019, 11:19 am

Lmao..... When are you guys gonna learn it's not worth taking risks in this sort of environment?

Remember what happened when Marjinz from Blackshades got arrested? He was arrested in Nov 2013 and the FBI ran Blackshades as a sting for an additional 6 months. Do you remember the status of Blackshades servers during those 6 months? Constant downtime while servers were being moved, imaged, etc.

Trev - March 30, 2019, 12:42 pm

been down for me about 16 hours. hoping we get a server reboot shortly!

It's been down for me for more than 24 hours. ?

Selfpwned - March 30, 2019, 1:19 pm

I really hope the Warzone RAT will be the new big thing in RATs - we really need a good RAT again with regular updates.

H4AED - March 30, 2019, 1:36 pm

Haven't used IM5 for about half a year so I wouldn't know. But like other people have stated, it seems suspicious and could have something to do with the police. I would be really low-key if I were you guys. Keep all your illegal software and anything that could get you in trouble on your thumb drive. Hide your thumb drive frequently to be safe. Reset your computer to factory default frequently

as well.

Unfortunately, there is no way to connect to your own server (if you make one). All you can do is wait for the licence server to start working again.

Gemstone - March 30, 2019, 8:12 pm

There is ofcourse a way to connect to your im5 server. just download the cracked version of im5 and upload ur new rat server.I have already done it.

And you get yours clients?

PablitoEmilio0 - March 31, 2019, 2:52 am

Here too im5 does not work and I am in Europe ...

yes you will get your clients, all options are not compatible,but file upload works fine.

Silent hill - March 31, 2019, 10:00 am

im5 developer has been arrested.
hat what i know for now.

Agree with you but ill got in warzone some small bugs

H4AED - March 31, 2019, 11:30 am

I would like to add that one time I did not use a Crypter and the owner of IM5 disabled my account when my username was reported. But when I contacted him to get it fixed, he enabled it.

So he probably has been arrested.

waterpolo - August 16, 2019, 1:45 am

is there any chance that IM5 would be up again?

Money Inc - August 16, 2019, 2:00 am

Id recommend doing some computer clean up..Didn't omni close his thread? Sounds like the feds caught up to him.
