Thread: [Hash identification?](#)

themet315 - March 29, 2019, 1:19 pm

Can someone help identify what hash function this is?

Hash: 1353cbf5ab649d7a55a38ca9795f8d92

Decrypted Hash: mblair96

Thanks

Looks like MD5 to me, you can always use a hash identifier to check.

themet315 - March 29, 2019, 1:36 pm

It's not, I checked. No salt also

Do you know of a tool that I can input both the hash and the decrypted hash and it can find the function?

Thank you so much. Guess there was a salt. How did you determine that if I might ask?
