Market price per mil right now is about \$0.75 /m. Not sure where you got your "market prices" from.

Also you should probably post in the Runescape Marketplace section. [Virtual Game Items](#)

Bro,
these are the prices of wholesale buyers and in any case 0.73 cents / m are the resale prices of the major sales sites

All sellers here, none are major sites. You're looking to buy gold at 27% lower than current market prices. GL!

Each to their own if you want to make a thread that's fine, just pointing out you might want to change your prices as you most likely won't get any sales.

Because you offer low buy rates, we can easily sell to a gold site for a higher payout rate.

Exactly, almost all sites offer at least \$0.65 / m.
