Title says it all recently got my cash app closed and coinbase was closed a while back for reselling coin. Would like to know any other options you guys know that offer close to 1:1. Verification isn't a problem by the way.

Looks like you've burned your two best options. I'd like to know also if there's a better method to buy at 1:1

check out goldux, i have used many times. fully automated and fees are always less than a few dollars.

I wouldn't really trust any site / exchange that sells btc 1:1. It's always best to be safe and buy 1:1 onsite or pay the Coinbase/blockchain fee

Coinbase and cash app where pretty much 1:1 and legit
