Thread: [Add Alert Setting - Disable Alerts of Ignored Members](#)

When an Ignored User replies to a comment of yours, you still receive the Alert for their reply.

I'm suggesting an Alert Option be added to resolve this or the Ignore feature be altered to include Alerts for Post Replies instead of just Messages.

I would love this, but I think Omni has openly expressed he has no interest in modifying the alerts plugin.

I'll close and leave it here.
