Thread: [Where to scan my file which does not distribute to AV.](#)

Sheriff1337 - April 4, 2019, 7:23 am

Can you tell me a website to scan my bin on?

Scanmybinnet costs and antiscan.me is not giving out free scans temporarily. Nodistribute also not working. ./

Looking for a free way to get my files checked scantime.

BTC - April 4, 2019, 7:25 am

I do not trust free scanner services. Antiscan is cheap, dyncheck is cheap, scanmybin is cheap. I see no reason not to use them.

If you are using free stuff it will always come at extra risk. Also will likely not be as accurate compared to more quality and constantly updated services.

If you are looking for accurate results then no free service will give you good results.

I have heard of SpyralScanner but personally advise against using it for practical purposes. It would say Win Defender is clean on scantime, then you scan it manually and it's evidently not clean.

Save up for using antiscan.me or something like this, it is very cheap.
