Thread: [Did reputation reset in the past 6 months?](#)

Filthy Frank - April 4, 2019, 9:17 am

Hey there,

I haven't been on this site for the past 6 ~ 7 months and I noticed my reputation is gone. I see there are some obvious changes, I still have to figure out what contracts are and what those 'B-ratings' are.

Anyways, I was wondering if in the past half year or so there has been a hard-reset of the reputation system.

I notice that a lot of people that interacted with older posts of mine also all have 0 reputation (few exceptions ofcourse).

I'm not making this thread to beg for reputation (which appearantly is not against the rules anymore lol), but I'm genuinely wondering if there was a reset.

Also I don't see a dedicated place to ask questions like this (maybe Rules, Announcements, News, and Feedback dunno, there used to be place for ub3rs to ask questions somewhere).

Thanks for any reply in advance :)

Hacker - April 4, 2019, 9:19 am

Yes Rep was reset.

Maybe this will be helpful <https://hackforums.net/showthread.php?tid=5856993>

.eXe - April 4, 2019, 9:19 am

Yeah, there was a reset. Rep is now canned and is worthless more than ever before.

Mix - April 4, 2019, 9:20 am

It was longer than 6 months ago bud.

Ah, then I probably missed it 6 months ago. (I usually check this place every once in a while).

Cheers for the other replies as well :)

Yeah man, it reset. You can ask for rep now as well, it's pretty much useless. They switched to a market rep system. You have to open a contract if you buy anything from anyone. Then they can rep you on your B Rating. Normal rep doesn't mean too much anymore.

Mom - April 4, 2019, 9:44 am

Well you can also pretty much buy rep with Bytes also, so I mean it's nothing to be proud about anymore, it's just a number now, but B-Ratings are the more important rep, since you HAVE to use

a contract now.

Effexion - April 4, 2019, 9:50 am

Yeah, man. I lost 2.5k myself ?.

I do understand that they created the B-Ratings system with the contracts, it's simply there so people can instantly see how thrustworthy of a marketplace user you are. The old reputation system kinda gave a false sense of securirty since you had to pro-actively check a user's reputation before doing a deal with them. Now you instantly see it.

It's just a bit meh to see the old reputation system got removed and replaced by "Popularity". I don't think that was necessary, but my opinion on it doesn't really matter. Luckily I didn't lose too much rep anyways, I believe I had somewhere between +400 and +700 anyways, thanks a lot guys for the info

edit:

Damn, that's actually a good idea, but unfortunately Filthy Frank is a dead meme :(

Yep. Also if you don't like any changes, don't go to Omni for it, just keep it to yourself, it'll help you out in the long run, trust me.
