It has been brought to my attention that user :

<https://hackforums.net/member.php?action=profile&uid=4095149> (Dash) has a fake Parasite HTTP sale website in his signature. The website in question is <https://hvnc.info/> and you should not buy anything from there. You will only get scammed and lose your money because the user (Dash) nor the website he is promoting do not have permission to sell Parasite HTTP even if they tell you otherwise.

His profile :

I confirm, user is an habitual scammer.

I just reported him again, and he changed username/avatar again.

Dash/Germany/Fisher

Do not contact this guy:

He already tried to scam us and other people.

I can provide any evidence if requested.
