This does seems skeptical however I went with OP on his teamviewer and he did show me his screen and he has a shit ton of logs and he did have around 695 valid FTP and he IS Russian (His system was all in russian) and his logs all had the correct timestamps of a few days ago so he does have what he claims to have but as always be careful.

After doing team viewer here with this member here is what I can provide:

Speed: 10/10 User instantly showed what he had to offer
Content: 10/10 from what I can see the user has access to the amount of sites he has stated
Reliability: 7/10 I only give this a 7 due to the fact I did not actually access any of the sites. I was just shown quickly. From what I can see though the seller can deliver his promise.

- Cocaine Vouches :) Always use contracts and be wary of all on site deals.
