ToS

If a code is broken, I will give you a replacement.

If you charge-back I will open a scam report and contact Google to have your order cancelled.

If you mess up the order and it gets cancelled. That is on you.

You only have 1 Hour Warranty on the code. If you wait longer and the code gets used. Thats also on you.

I know the BTC Network is pretty hectic right now. So I will only be waiting for 1 confirmation unless you're trusted then I'll accept at 0 Confirmations.

Edit:

I don't know if you're trying to scam me or what. But this wouldn't work. Your obligation is either \$9.99 PayPal or \$9.99 BTC :D

You purchased the code, I gave you the guide for free. Glad it worked for you and I hope you enjoy your new device.

I'd like to purchase a code, but as viewed above, I'd also like the guide, would it be possible to get both...?

Yeah but due to your reputation I'm only going to accept BTC/ETH. Is that ok?

The guide is given free to everyone :)

Unfortunately, I do not have BTC at the moment, but I'd be happy to do an exchange with someone... I can also do venmo or cashapp?

I assure you I have no reason to scam over \$10.... my paypal is verified.

Thats what everyone says. I'm not saying you're a scammer. But scammers do say that and it ruins it for legit people.

I know this is random but if you have Oldschool Runescape Gold I'll accept that on this one-off occasion.

I'm assuming, given it's a UK service, you cannot ship the google home mini anywhere in the US with the code?

No its completely free my dude. No Delivery Free, No Device Cost. Only charge is £1 on your VCC. But that's shortly refunded after.

The boxes look a lil different from the US from a few months ago but that makes sense BC it's for a different region. Anyways this is a gold mine and I personally made over 1.5k from reselling the minis and they sold fast af. GLWS op

If I bought a few of these, how would I get past the \$1 verification? I'm assuming if you order multiple you can't use the same card.

Would you recommend using your personal card or a VCC?

I have a super private method to use one VCC several times but thats only for customers haha. Most people (90%) are using a new VCC for every single order.
