Do you sweat on/inside your ass? Because I do every summer and its fucking annoying  
Sometimes my balls are also hot and almost sweating, my hair is cutted off, im in public and so  
sometimes I want put them on air and cant.

Sometimes I have to change my underwear up to 3 times a day.

Do you boys have the same? its annoying-\_-

Sounds like you need to splash some powder on those areas. I believe there's a "men's" product for  
this, dude something. Here I found it

Apparently people need this shit, just like foot powder. How do people even sweat from their feet?

Listen, I'll wear boxers up to 6 days a week no change, jerking off with them on too.

Do you ejaculate inside them? Makes for another layer of protection against the elements.

**PerfectStorm** - April 5, 2019, 11:02 pm

Ah not generally but sometimes i guess

**Mercury** - April 5, 2019, 11:06 pm

When I was in my teens I did. Now it only happens when I'm outside doing physical activities. If you're young, it may just go away in time. If not, do what omni recommended. That helped me.

This is such a wholesome thread.

Baby powder is the solution to your problem - Girls use it too. Not for that, but inbetween the thighs during summer.

**Dope** - April 6, 2019, 6:39 am

I do, but I can't really do much about it. I'm not a dude though. Girls have booty sweat too.

I tried using baby powder on my hands cuz that's my main sweat problem but it didn't work. Didn't try it on my ass though, I feel like that's a bit weird hahah.
