Thread: [Needing help with retrieving passwords from my browser](#)

D3mian - April 5, 2019, 8:06 pm

Hi guys! Pretty straight forward, today a co-worker used my laptop to access his gmail account through a Firefox Browser. Is there any way to recover his password? He obviously didn't saved his account publicly on my browser.

I searched a little bit and there are some tools online like PasswordFox or Firefox Password Recovery Master, but they seem pretty sketchy.
