Rat and Keylogger - April 9, 2019, 10:29 am

Hello i have one ask.

I using njrat. i made server. and i making crypter and i gooing scan using antiscan and spyral scan. Few ago later my njrat was open igot few slaves. what? Im not was upload my file nothing. slaves was only combuter where was nothing. combuters was basic window 7 8 and xp. later all slaves lost I think distibuting spyralscan or antiscan my file? has this happened to others?

Exodus - April 9, 2019, 10:33 am

Your file is definitely getting analysed.

NYANxCAT - April 9, 2019, 11:44 am

Windows 7 and xp

And CMD was opened

Yup it's the FBI !

Read the [Help Docs](#) before ever posting again. Firstly you cannot refer to connections on your remote access tool as slaves. Secondly you are being honey potted its most likely anti-virus companies running it on a virtual machines.

Good luck if your not hidden away behind a vpn and a decent DNS otherwise FBI or police will see you soon.

Yes but that not is what im ask.

Xavier - April 9, 2019, 1:11 pm

It is a honeypot. They are analyzing your stuff.

Don't scan your stuff there anymore.

starforce - April 9, 2019, 1:18 pm

this what wel hapen the vpn provider wel get report/end/or the ip wel be blacklist

this site MxToolbox Blacklist wel report all isp the ip it is like it is early warning system to preven mess ddos etc etc

thet all if you have a good vpn provider

regards

Your question was already answered people are giving you advice so you are not a statistic, probably would help if you heed it.

int - April 9, 2019, 1:40 pm

they are honeypots

one of the sites that you scanned it on gave it away

starforce - April 9, 2019, 1:50 pm

or anti virus system avast windows defender etcetc

It's a bad idea for obvious reasons, but you're making up rules now.

Hmm weird, I remember Omni making a post afew years ago literally saying no one can say anything involving slaves or targets etc...

Maybe i'm wrong? But i really don't think so.

I don't remember that. Never seen anyone get banned for calling them slaves.

Spade - April 9, 2019, 5:19 pm

someone just hybrid analyze your shit

PerfectStorm - April 9, 2019, 5:20 pm

I only had to read the title to know. Honeypots.

Rat and Keylogger - April 9, 2019, 8:35 pm

Thanks all reply. that now sure they really was distubutin files and file was fud now its get detec... now back to VS and makin new crypter. What is nowadays safe scanner that no distubuting files.

You need to pay for services like that. Also no police will care that you have a crypted NJrat stub, they care when you start spreading and getting lots of infections

Psy Ops - April 9, 2019, 9:07 pm

You're going to get caught and spend time in a prison. It's only a matter of time. Don't RAT.

Unless your using it "legitimately" but due to the context ad everything the OP said.. I have to agree..

ImZero - April 10, 2019, 5:52 am

They are honeypots, your malware was being analyzed by av companies. Change to a non-distributing scanner.

hello friend

those good because volunteers

u not made them install

but they volunteer

so this good for you

because you get extra victems

for free ?

#Natasha - April 10, 2019, 7:02 am

Im 100% Sure that you can spread and rat for ages with minimum protection and you will not get arrested in any way. Police have more important things to do then catching skids online who have 30-50 slaves ^^
