(Apr 13, 2019 12:03 PM)Lit Wrote: [\[CITE\]](#) So I got a vouch copy from OP to test out & I have to say WOW!

Atrosnap is seriously amazing. It has a great design, super simple to use and it just keeps on getting better and better. From what I have seen in the past 2 weeks of having the app, Atrocity cares a great deal about this app and he is constantly updating it and improving the app to make it better for his customers.

I have used the other methods to send live snaps, but they were usually a hassle of having to jailbreak my phone or some other complicated process, but not with atrosnap.

If you're looking for a way to send live pics and videos on snap and want to step up your game, I HIGHLY SUGGEST taking the leap and buying his app. First off, the price is great, the customer support is awesome and dedicated to helping with anything. You can't go wrong getting this app. Personally I'm amazed at the quality of it. Big vouch from me!

Is it possible with this app to upload a longer video and have it split into ten seconds snaps as it uploads? Like for instance a 1 minute video will be split into 6 - 10 second videos so they upload as 6 snaps? Not sure if that is even possible or not, but if so, I'm definitely interested.

EDIT: Apart from saving, our app does not support saving stories and we won't be able to help you with this.. but we can help view stories & dm's without the sender noticing.

We aren't allowed to discuss or share anything related to discord on HF buddy, sorry!

But this is a sales thread, not a giveaway thread.. personally I don't want everyone finding out about the emulator working with snap as it will just get it fixed fast, but thought it's only fair to share with customers.

There may be an update for you to download, but the app will still continue to work on the update :)

We will test as soon as it is release, if it doesn't work we will let everyone know not to update until we have it working on new update, but 99% it will still work with no issues anyway my guy!

App is worth every penny. If you know how to ewhore using snapchat this just makes it 10x more effective.

klatzen - June 14, 2019, 8:16 am

Last questions:

Does it risk your account?

tiffxny - June 15, 2019, 1:09 pm

Started a contract. Heard great reviews about this from other forums.

weirdbrah - June 15, 2019, 6:39 pm

So I've purchased the app three days ago and I have already sold 6 premium snapchats (40\$ each) and 4 dropbox links (35\$ each) so I guess my earnings kinda tripled with this app so if you ask me its worth every penny and even more than that.

and now im thinking about scaling this since its obviously working as described.

Thanks bro!

I purchased on Monday and now it is Friday. Dude legit replies one message every 48 hours. Fuck I thought yesterday I am gonna have it, even told him to not please go offline since I reply quickly. 1 message received and now he's offline lmao. This is some fucking pigeon mail communication type stuff. I have legit lost 5 days of earnings, fucking 5 days, what if I got lucky with some cuck customer that would be willing to pay \$400? What if I couldve earned \$800 this week? Legit got 300 adds on my snapchat, what if 10 customers wanted to buy from that traffic? Honestly I am tilted right now, dude needs to think about selling this apk and realize that he needs to deliver quickly because his customers are fucking losing money, this apk method will get patched quicker than I will receive it lol. Legit Atro, idk.. Buy mobile data? So u could deliver when u r away from pc? Go somewhere outside to catch WiFi? Sorry but this is legit the worst support I've ever received in my life, srsly whqt the fuck 1 message every 48 hours just wtf. Now I have to wait like 40 hours to get another message, great and so much profit lost from ewhoring.

All orders have now been processed, sorry for the delay recently. I'm now getting back on top of things, I'll be going through the system to make sure everyone has what they paid for and compensating those who have waited too long.

I have some new stuff coming soon too, will be releasing a friends tool soon (with his permission ofc), which will be very useful for everyone I'm sure.

Again, I'd like to apologize for my horrific customer service this past month - as you can see, it has not always been that way, and it won't be like that any longer.

Fresh start, thanks for your patience and understanding.

I've received everything no problem.

Just the app doesn't work currently and Atro is waiting on someone else to fix something that went wrong/needs to be renewed. He's taking his time with that it seems.

I don't mean to rush anything, but when times are constantly pushed back in fixing something, it makes me impatient.

I don't see where to go to ask a question but can this be multi-threaded to handle multiple accounts?

Also Do i Need an iphone or Android to operate it or can i just run an emulator for android or is none of that needed?

Also when scheduling an queuing post can you have swipeup links?

If you can answer this then im ready to buy today. Also any requirements on my local OS?

43wgsergse - August 13, 2019, 12:12 pm

Same here as some people on the last posts, I purchased this product from his website 3 days ago now.

I've gotten one response from him here on HF which was just asking me to add him on discord, which I had already done

And for me to fill in the registration form I got when I purchased, which I did at the time of purchase. That message was 44 hours ago now... And no contact since then.

Is the app actually just broken at the moment?

Some communication would be nice before I decide to charge-back, no communication and no product...

Edit:

I started a charge-back on PayPal, and he started responding

I have now gotten the app, but it's not activated yet, iOS, so the UDID needs to be added somewhere or something.

So still no usable app, but one step closer I guess

Got access to my product now, as I was on iOS there's some extra stuff that needs to be done to make it installable without jailbreaking, which was out of Atros control. Only gripe was lack of communication, as I see others seem to be irritated about as well.

As for the app itself, it's amazing, hands down the best money I've spent when it comes to eWhoring.

Using iPhone X on iOS 12.3.1 and it's been flawless so far, loads videos and pictures without issue.

@everyone I had to take some time out offline to focus on real life, shit was building up and I couldn't juggle between the 2.

There is a known issue for ios 13.1, please avoid updating if you haven't already.

I will have the issue fixed asap, but it will require users to re download the app, I'll need users to submit a fix request form so i know who is still active and transfer those over to working IPA's, please bare with me and I'll create and post a link for this form here very soon.

Users will receive a download link to the new iOS app as fast as possible, please remember with hundreds of customers, this may take some time and errors may be made - I'll try get it all transfered over with minimal effect on users, for now - I know it's shit, but trim your verification images into 1 second video's, that way should minimise loss of income due to only video's working.

Sorry about this, obviously it's out of our control as we don't deploy ios updates and cannot predict changes.

Thanks for your understanding and loyalty to AtroSnap.

As for source code being publicly available,) the "source code" is android only, and is not the source code for atosnap, but a source code for a very simple and basic app that lets you send vids and pics - I'm happy to post the link here myself, I have no problem with people using a free alternative and maybe picking up some coding skills along the way- it's not AtroSnap but hey, you can still send pics and vids to snap :)

their dev account got suspended, nothing you can really do

HQCheckers - October 13, 2019, 9:30 am

An email has been sent out to customers :)

PornFlakes (the other guy who sells an app) reported AtroSnap to both Snapchat, and Apple (that I know of).

Due to his jealousy it caused our dev account to be suspended, it's not a problem though - we are already making a comeback and better than ever, but honestly not sure why somebody would report somebody else for doing something they're doing themselves - don't throw stones when you live in a glass house?

BIG AtroSnap update coming very soon, around Christmas time we have a new addon which will allow users to Schedule Posts to stories, manage friends, messages and more all from an innovative web panel - obviously prices will rise with this huge update, along with the frown on PF's face :(

ANY customers with issues, PM me - we NEED to get it resolved asap, I can't help if you don't PM me!

Would like to point out, AtroSnap price has decreased to only \$24.99 for android, and \$25.99 for iOS!

The limit for video's and images is 18mb.

Yes, AtroSnap has an Auto Crop feature which can be enabled/disabled on your discretion.

A package with unlimited usernames/changes can be discussed yes, or alternatively, a username change, or to add an additional username will cost \$20.

What is the difference between atro and snxp?

AtroSnap includes mini gallery system which allows you to organize / queue uploads, it's very useful for quickly sending "catagorised" images, such as verifications, memes etc.

We also have a community support group, and 3 members of official support team, this means for official support, there are 3 people who can assist you if I'm offline, if they're not available, you can ask the AtroSnap community who are also very helpful :)

Other than that, there's not much difference between me and SNXP, except.. I don't report people to Snapchat / Apple if I don't like them like he does :)

Inspect Element - November 10, 2019, 1:50 pm

Huge vouch for AtroSnap. Although the setup itself is explanatory and Atro provides an easy read through, he's been extremely responsive towards any questions I've had in regards to the app.

Setup was quick and easy. The app works flawlessly and I'm very satisfied with what I recieved.

Cheers again Atro! ?

A contract is required for all purchases, this could be one reason you've not received the product yet.

All customers who buy and submit activation request receive product within 24 hours - although there is a delay of up to 24/48 hours as mentioned when buying currently.

Unfortunately, I can't give any support or acknowledge orders here unless we have a contract, this is the hf rules - all sales must have a contract.

Alright my experience was like this:

Bought the app from the official site and just after i came here to verify as they moved slow, 25hours or so to deliver the app.

But it's legit and it is worth it, it works. Their support is fast and all is smooth definitely worth the money. Just be sure to fill in the correct data that they will request from you.

BIG THANKS!

Your app was working fine.

Due to one of our developer accounts being banned, there is an issue for a load of people on iOS, and customers currently waiting for the new iOS license.

We're working on the new dev account and will be sending out emails soon. This kind of stuff is out of my hands and all I can do is ask for your patience and understanding.

However due to issues with Apple there has been a big delay in recent orders deployment, this will be sorted asap and should possibly have an account in the next couple of days.

On top of this one of our other licenses got banned, so that has also caused some unwanted drama and lots of people to lose access to the app - while we get it fixed.

Android works fine however, no issues and no from in either.

It's self explanatory bro, it allows instant sending of live pics/vids to story and friends, also comes with built in custom gallery tabs allowing you to organize or catagorize uploads for quick sending within the click of a button, saving you time where you may usually have to search through your gallery for the right image.

If on n3/ the dev license was banned, you'll need to buy again - but ofcourse a discount will be applied.

It's made clear that for iOS there are no free replacements upon rare situation where the developer license is banned.

Support after 1 Week of nothing. Garbage Tool! sorry

It does not stop working every 2 months, only 2 developer licenses have been banned in the lifetime of AtroSnap. 1 was last summer, 1 was this February.

Also, AtroSnap is very cheap, 99% of our buyers earn atleast 10x their investment in the first month, let alone a year, so - if you're earning so little that you're complaining about spending \$30 on a tool that earns you lots, I suggest you give CyberError a PM and buy his ebook :)

I have over 1,000 happy customers, and I don't think it makes AtroSnap a garbage tool if in it's lifetime, 2 apple developer licenses have been banned - yet AtroSnap generates income in big excess of \$1,000 per month!

Have a great day, thanks for your garbage review <3

Teflon - March 28, 2020, 6:41 am

Vouch for Atrosnap, my 'go to' Snapchat tool for sending live pics/vids. No 'from camera' message like other tools on hf. Plus I can save 24 preset pics in the 'Gallery' which saves a ton of time. The

customer support can be lacking at times, but eventually he will fix the issue (which may cost u tons of \$\$). But overall I'm definitely happy with app.

Delivered it. Unlimited package always takes longer to deliver, it's a custom built app.

We do not have a contract, this means you have not purchased via HF and I'm unable to support you here as per the rules.

If you purchased through HF, we need to make a contract now, and you should not have paid

without having opened a contract with me.

Hey I use to use another app that stopped working today. For your service after loading the pic from camera roll do you have to save it to memories and then send it from memories so it posts like a normal snap to your story?

And is it 25\$ a month or 25\$ per username slot for iOS?

Nope, just select image and it go straight to snapchat with no from camera roll, and it's \$25 per username slot!

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

High expectations about this app. It's been 48h already since I paid and still no news but I'm

guessing there must be a good explanation. I only heard great things.
My bad for not creating a contract before buying.

HALCYONIK - February 28, 2021, 7:07 pm

So is this per username or are you buying something you can use forever? I'm on android btw. I need it for both a regular and a premium snap.

Has anyone heard from the seller recently? I'm not sure if he's busy or just taking a break but i have made a purchase and haven't been able to make any solid contact with him just sporadic discord messages, i've emailed the support. Does anyone know of any other contact details for them?
thanks

Purchased yesterday and haven't heard from seller but everything looks good so far. Apparently he's been M.I.A lately so hopefully we can get activated ASAP

Seasons - March 31, 2021, 3:49 pm

quick edit: resolved it with atrocity

hackdanny - April 7, 2021, 4:18 pm

Made purchase on 03/22/2021. Went first, paid full amount in BTC and was asked to wait 24h.

Atro contacted me 10 days later (03/30/2021) to tell me he couldnt deliver the software due to an IRL issue. Seeing as I had already paid and there was radio silence for 10 days, I was just happy to have contact at this point. The paypal account he was using to purchase UDIDs was in the negative so unless I was willing to buy my own UDID (\$10 extra on top of what ive already paid), I wasnt getting my software anytime soon.

I have proper documentation (BTC confirmation and full logs) if I need to verify. Having to pay first and being promised a product within 24h and waiting 10+ days to just be asked for more money feels like shit.

Ik shit happens and we cant control what happens irl but as of the day of this post (04/07/2021), 17 days after ive paid and 7 days after he messaged me, I still dont have it. Ill keep this post updated.

Just to confirm, scammer.

escobarmoney - September 26, 2021, 9:03 am

I paid him AGAIN for username replacement (15\$, back in days 2019 I paid him 35\$ for fully working program), and no answer! Totally ignoring and he told me to check my mail, but there is nothing!

OPSkeleton - January 16, 2022, 1:29 am

!!! Paid for his website creation on 29.12.2021 he replied a few times but never delivered the site.
Scammed me for 150\$

DO NOT TRADE WITH THIS GUY.

I once bought the live snap app and everything went smooth so I trusted him.
I don't get how this guy is still not banned.
