Thread: [How can I undetect Revenge Rat](#)

DnaHacker - April 10, 2019, 2:18 am

How can I encrypt revenge rat server
Like it doesn't need to be FUD but atleast 1-5/30
Also the it has to be free

Maplie - April 10, 2019, 4:55 am

Use a crypter. Then you'll be FUD.

DnaHacker - April 10, 2019, 5:55 am

Yea but what kind of?
and it has to be free.

btw I use revenge rat so yeaa

Maplie - April 10, 2019, 6:11 am

You won't find a crypter that's free and FUD.

If it's free everyone will use it so it will very quickly no longer be FUD. This goes for pretty much any malware, virus or trojan.

DnaHacker - April 10, 2019, 6:59 am

Again I don't need an FUD rat.

like 1-5 detected atleast

Listen. Its not going to happen buddy.

Save up or go home.

DnaHacker - April 10, 2019, 8:08 am

I mean I can afford it but it's bitcoin.

and idk what's the best crypter for revenge rat like 20-50eur if paypal

I can even do paysafecard.
