I'm curious what is your posts per day (past month) as displayed in this page.

<https://hackforums.net/buysigs.php?action=change>

I apologize if I can check yours myself, I could not find it.

When you click that link, I guess you check yours, not mine.
That's basically the link to rent your sig.

On the link I sent, it will display your stats and there you can find the "Posts per day (past month)" Statistic. I believe you can see this when purchasing a signature in the sig market. As it is different from the stats you are displaying in your screenshot which is available on your profile page.

I'd like to know as that number is a lot more important than just your posts per day on your profile page ?

In my provided image it's 7.27 PPD. <https://gyazo.com/cc71b977515ad5400a5fb335ae40b548>
Or am I missing something?
It may not be so impressive as per liking of you guys, but I'm open to offers.
Interested people can shoot me message.
Thanks.

a bit off topic: but nice one libtard

Deal - April 18, 2019, 8:01 am

Bro \$10 a month is way too cheap considering your post count. I'd hate to see you sell your signature for 3 months for the same that no other charges for 1.

Hello Newbie here,

I am interested. Can I LINK back to my site which sells SEO services?

Also, what is the maximum banner size allowed here?

Thanks.
