Thread: [Thread pages reduced by ~30%](#)

Jombah - April 11, 2019, 9:42 pm

Seems like threads were shortened and I can't find any info on it. My Fortnite thread lost 10 pages, and I checked Meow's thread and it went from ~250 pages to 170.

It doesn't really matter I think just want it to be known incase it wasn't.

Edit: Replies per page went up

33% (10 to 15) which is why the amount of pages shrunk for anyone curious.

I think more than 10 replies per page is being shown now. That's why pages have shrunk.

Default page is now 15 posts instead of 10. More content on each showthread page but less pages.
